Her candid memoir offers a rare behind-the-scenes look at the television industry and its politics. It also tells her own story-of how a young girl from Mildura became a leading innovator in Australian children's television production, and a voice to be reckoned with in a tough business. As a regulator and policy maker, Dr Edgar's take-no-prisoners style won her great fans and made her bitter enemies. Dr Edgar was the first woman appointed to the Australian Broadcasting Control Board. For ten years she fought for more locally produced, first-release children's drama on Australian television. In the early 1980s she helped establish the Australian Children's Television Foundation, creating some of the most celebrated television ever produced for Australian children, including the

Round the Twist series, which sold into more than 100 countries. Along the way, Dr Edgar worked with a host of notable Australians, including Janet and Robert Holmes O Court, Bruce Gyngell, Hazel Hawke, Phillip Adams, Gulumbu Yunupingu and her brothers Galarwuy and Mandawuy, Steve Vizard, Hilary McPhee and Paul Jennings. Bloodbath sets its author's triumphs and setbacks in the television industry into the wider perspective of political and economic change, the forces of consumerism and the global marketplace. This memoir reveals Dr Edgar as she really is—a sensitive, thoughtful, determined woman, still working to make the media environment one of quality not pap and a force for learning as well as entertainment. **abc for kids play school: Being Australian** Catriona Elder, 2020-07-24 After a century of speculation by writers, filmmakers, travelers and scholars, 'being Australian' has become a recognisable shorthand for a group of national characteristics. Now, in an era of international terrorism, 'being seen as un-Australian' has become a potent rhetorical weapon for some, and a badge of honour for others. Catriona Elder explores the origins, meaning and effects of the many stories we tell about ourselves, and how they have changed over time. She outlines some of the traditional stories and their role in Australian nationalism, and she shows how concepts of egalitarianism, peaceful settlement and sporting prowess have been used to create a national identity. Elder also investigates the cultural and social perspectives that have been used to critique dominant accounts of Australian identity, including ideas of class, gender, sexuality, ethnicity and race. She shows how these critiques have been, in turn, queried in recent years. Being Australian is an ideal introduction to studying Australia for anyone interested in understanding Australian society, culture and history. A clever work: incisive and original. At a time when Australian identities have

never been more debated, Elder finds an open way through the closed doors which often restrict cultural representations of Australian-ness.' Professor Adam Shoemaker, Dean of Arts, ANU This is a timely and significant new analysis essential reading on issues of identity and our own anxieties about national belonging and what it means to be Australian' in a globalising world.' **abc for kids play school: *Environmental Communication for Children*** Erin Hawley, 2022-09-05 This book explores the nexus between children, media, and nature during a time of planetary crisis marked by climate change, biodiversity loss, and environmental degradation. In this time of planetary emergency, children have become an increasingly visible part of conversations about the human/nature relationship – they have also become an important market for environmentally-themed media content. Indeed, recent years have seen a proliferation of environmental texts, products, and narratives for young people: children are recognised and addressed as audiences for environmental content across a range of media including news, films, television programs, magazines, videogames, and transmedia franchises. Through analysis of a range of case studies, this book examines the construction of children as green audiences, the intersection between media and environmental literacies, and the mainstreaming of children's voices in environmental communication. The book will appeal to readers with an interest in children's media and the industry imperatives that shape the production of children's culture as well as to students, scholars, and practitioners in the field of environmental communication.
