There's a famous piece of writing advice—offered by Ernest Hemingway, Stephen King, and myriad writers in between—not to use -ly adverbs like "quickly" or "angrily." It sounds like solid advice, but can we actually test it? If we were to count all the -ly adverbs these authors used in their careers, do they follow their own advice? What's more, do great books in general—the classics and the bestsellers—share this trait? In the age of big data we can answer questions like these in the blink of an eye. In *Nabokov's Favorite Word Is Mauve*, a "literary detective story: fast-paced, thought-provoking, and intriguing" (Brian Christian, coauthor of *Algorithms to Live By*), statistician and journalist Ben Blatt explores the wealth of fun findings that can be discovered by using text and data analysis. He assembles a database of thousands of books and hundreds of millions of words, and then he asks the questions that have intrigued book lovers for generations: What are our favorite authors' favorite words? Do men and women write differently? Which bestselling writer uses the most clichés? What makes a great opening sentence? And which writerly advice is worth following or ignoring? All of Blatt's investigations and experiments are original, conducted himself, and no math knowledge is needed to enjoy the book. On every page, there are new and eye-opening findings. By the end, you will have a newfound appreciation of your favorite authors and also come away with a fresh perspective on your own writing. Through essays about the first recorded vampire craze, television shows *True Blood*, and *Being Human*, movies like *Blade: Trinity* and *Underworld*, to the presentation of vampires of colour in romance novels, graphic novels, on stage and beyond, this text will open doorways to discussions about Otherness in any setting, serving as an alternative way to explore marginality through a framework that welcomes all students into the conversation. Vampires began as terrors, nightmares, the most horrifying of creatures; now they are sparkly antiheroes more likely to kill your dog than drink you to death; commodified, absorbed, and defanged. *Race in the Vampire Narrative* demonstrates that the vampire serves as a core metaphor for the constructions of race, and the ways in which we identify, manufacture, and commodify marginalized groups. By drawing together disparate discussions of non-white vampires in popular culture, the collection illustrates the ways in which vampires can be used to explicitly help students understand ethnicity in the modern world making this the perfect companion text to any course from First Year Studies, Sociology, History, Cultural Studies, Women's Studies, Criminal Justice, and so much more.
