### Howard Beale’s Character as a Symbol of Media Disillusionment

Howard Beale’s transformation from a jaded news anchor to a voice of public anger mirrors the trajectory of media figures who, in real life, have challenged institutional norms. ## The Psychological and Emotional Impact on Audiences

Beale's appeal to viewers to shout their frustrations out loud taps into a collective emotional experience. It validates their anger and encourages active participation rather than passive consumption. This emotional release is a powerful mechanism that media psychologists argue can foster both catharsis and division, depending on how it is channeled.

**howard beale mad as hell: HyperHumanity** Mike Hockney, 2013-07-28 Humanity is a single biological species but has split into two different mental species labelled Mythos and Logos. The Mythos species is driven by emotional stories, not by facts, evidence or rational arguments. Even scientific materialism is a Mythos – the sensory Mythos – which asserts that rational unobservables, undetectable by the senses, simply cannot exist. **howard beale mad as hell: That's the Way It Is** Charles L. Ponce de Leon, 2015-05-04 This “engaging and important” study examines the evolution of TV news and its long history of blending journalism and entertainment (American Historical Review). Today’s media critics often decry the state of television news, saying that it’s too dumbed-down, becoming more entertainment than information. But this familiar narrative fails to acknowledge real changes in media and Americans’ news-consuming habits. It also harkens back to a golden age that, on closer examination, is revealed to be not so golden. As Charles L. Ponce de Leon explains in *That’s the Way It Is*, TV news has always walked a fine line between hard news and fluff. Ponce de Leon traces the entire history of televised news, from the household names of the late 1940s and early ’50s, like Eric Sevareid, Edward R. Murrow, and Walter Cronkite, through the rise of cable, the political power of Fox News, and the satirical punch of Colbert and Stewart. He describes an industry forever in transition, where newsmagazines and celebrity profiles vie with political news and serious investigations. The need for ratings success—and the lighter, human interest stories that can help bring it—Ponce de Leon makes clear, has always sat uneasily alongside a real desire to report hard news. Highlighting the paradoxes at the heart of TV news, and telling a story rich in familiar figures and fascinating anecdotes, *That’s the Way It Is* offers an insightful and engaging account of how television has presented our history as it happens.

Ehrlich's *Journalism in the Movies* is the story of Hollywood's depiction of American journalism from the start of the sound era to the present. Ehrlich argues that films have relentlessly played off the image of the journalist as someone who sees through lies and hypocrisy, sticks up for the little guy, and serves democracy. Focusing on films about key figures and events in journalism, including *Mr. Smith Goes to Washington*, *All the President's Men*, and *The Insider*, *Journalism in the Movies* presents a unique opportunity to reflect on how movies relate not only to journalism but also

American life and democracy.

**howard beale mad as hell: Seeing through the Screen** Bruce E. Altschuler, 2017-11-22 Although films affect and reflect the way Americans look at politics, they have received far less attention than television or newspapers. This is changing, particularly on college campuses, where courses on politics and film are growing in popularity. This book consists of short essays on approximately fifty American political films. It is distinctive in two ways. Firstly, it defines politics broadly enough to include a range of films, not only on obviously political topics such as the presidency, congress, and elections, but also on the media, law and courts, war and peace, and a variety of policy issues. Secondly, it goes beyond plot and dialogue to discuss the language of film, including visual aspects, sound, mise-en-scène, and other ways that films communicate their messages to audiences. Each chapter begins with a brief introduction to the films included. The essays also explain the political context of each film and, when films are based on historical events, discuss the accuracy of their depictions. References to additional sources are included at the end of each essay. This book explores the extent to which films take on the political issues of the day and their influence on public perceptions of politics. Do films support the status quo or do they challenge it?

**howard beale mad as hell: Movie Time** James Combs, 2009-03-26 Movie Time is a study of temporal mythmaking in American popular movies. The work is rooted in American pragmatic philosophy and contemporary traditions of inquiry in the social sciences and humanities. It proceeds on the premise that social beings and social orders are interested in the mediation of time, and attempt to make sense of their present world through the reconstruction of important pasts of interest in the present, develop new presents with the help of popular expressions which define new situations and responses for a new time, and foresee possible futures which impinge upon life in the here-and-now. In particular, the work focuses on the subsequent treatment of the American 1950's in films set in that era, beginning in the 1970's and continuing, with an effort to create a rough taxonomy of mythemes in such retrospective films, and why it is that future times would find the Fifties to be so important that people wish to revisit it. Too, the mediation of time includes the development of a new present, in this case the emergence of conservatism as a social force in the 1970's and beyond. The movies were an important form of expression in the dramatization of the conservative myth, leading to the pervasion of conservative leaders and ideologies into the new century. Finally, the unrealized but imminent future of the country and world was increasingly on people's minds, as both millennial hopes and fears and unanticipated threats began to emerge at century's end, so movies which anticipated alternative futures appeared in response to that prospective interest. It is hoped that this present inquiry will stimulate further work on the social relevance of popular expression and in particular the social mediation of time.
