California Implicit Bias Training: Understanding Its Impact and Importance

california implicit bias training has become a pivotal topic in workplaces, schools, law enforcement, and government agencies across the state. With increasing awareness about social justice and equality, California has taken significant steps to address the unconscious prejudices that influence decisions and behaviors. This training aims to foster more inclusive environments by helping individuals recognize and mitigate their implicit biases. But what exactly does this training entail, and why has it gained such momentum in California? Let's explore the nuances of implicit bias training in this vibrant and diverse state.

What Is California Implicit Bias Training?

At its core, California implicit bias training is a structured educational process designed to make individuals aware of their unconscious biases that can affect interactions and decisions without their conscious knowledge. These biases are automatic mental associations influenced by societal stereotypes, personal experiences, and cultural messaging. The training helps participants identify these hidden biases and equips them with tools to minimize their influence.

California has been a frontrunner in legislating implicit bias training, particularly in sectors like law enforcement, healthcare, and education, where decisions deeply impact people's lives. The state mandates implicit bias training to promote equity and reduce disparities in service and treatment.

Why Is Implicit Bias Training Crucial in California?

California is one of the most ethnically and culturally diverse states in the U.S., home to millions of residents from varying backgrounds. This diversity is a strength, but it also brings challenges related to communication, understanding, and systemic inequality. Implicit bias training acts as a bridge to close gaps by:

- Enhancing cultural competency among public servants and employees.
- Reducing discriminatory practices that may occur unconsciously.
- Improving trust and relationships between communities and institutions.
- Encouraging fairer decision-making in hiring, policing, education, and healthcare.

By training individuals to recognize their biases, California aims to cultivate a more

inclusive society where everyone has equal opportunities and respect.

Key Components of California Implicit Bias Training

Implicit bias training in California generally combines education, self-reflection, and practical exercises. While programs may vary depending on the organization or sector, some core elements consistently appear:

1. Understanding Implicit Bias

Participants learn what implicit bias is, how it differs from explicit bias, and the psychological mechanisms behind it. This foundational knowledge is essential for grasping why biases operate below conscious awareness and how they influence behavior.

2. Identifying Personal Biases

Many trainings use tools like the Implicit Association Test (IAT) to help individuals uncover their own unconscious biases. This step promotes self-awareness, which is the first step toward change.

3. Exploring the Impact of Bias

The training illustrates how implicit biases affect decision-making processes in real scenarios. Case studies, role-playing, and group discussions highlight the consequences of unchecked biases, such as disparities in law enforcement stops or unequal access to healthcare.

4. Strategies to Mitigate Bias

Participants learn techniques to reduce their biases, including perspective-taking, mindfulness, and structured decision-making protocols. These strategies encourage deliberate thinking and empathy to counteract automatic prejudices.

5. Commitment to Ongoing Learning

Implicit bias training emphasizes that addressing bias is a continuous journey. Many sessions conclude with action plans or resources for further education, ensuring that the lessons extend beyond the classroom.

California Legislation and Implicit Bias Training Requirements

California has implemented several laws to embed implicit bias training within institutional practices. For example, the state requires law enforcement officers to complete implicit bias training to promote fair policing and reduce racial profiling. Similarly, public schools and healthcare providers are encouraged or mandated to participate in such training to foster equity.

These legislative efforts reflect California's commitment to proactive measures against systemic racism and discrimination. By mandating training, the state ensures widespread awareness and accountability.

Impact on Law Enforcement and Public Safety

Implicit bias training in police departments aims to decrease incidents of racial profiling and excessive use of force. By increasing officers' awareness of their unconscious prejudices, the training seeks to build stronger community relations and promote justice.

Role in Education and Healthcare

In schools, implicit bias training helps educators recognize how unconscious biases may affect student discipline, academic expectations, and interactions. In healthcare, it helps professionals provide more equitable care by addressing biases that can influence diagnoses and treatment recommendations.

Challenges and Criticisms of Implicit Bias Training in California

While implicit bias training is widely supported, it is not without its challenges and critics. Some argue that a single training session may not be sufficient to create lasting change. Others point out the difficulty in measuring the direct impact of such training on behavior.

Common Concerns

- **Effectiveness:** Critics question whether implicit bias training leads to tangible changes or just temporary awareness.
- **Resistance:** Some individuals may feel defensive or skeptical about the concept of implicit bias, hindering engagement.

- **Implementation Variability:** The quality and content of training programs can vary widely, affecting outcomes.

Despite these concerns, many experts agree that implicit bias training is a valuable starting point for addressing deeper systemic issues. Ongoing efforts, reinforcement, and organizational commitment are necessary to maximize benefits.

Best Practices for Effective California Implicit Bias Training

To ensure implicit bias training is impactful, organizations in California should consider the following tips:

- **Customize Content:** Tailor training to the specific context of the workplace or community to make it relevant.
- **Use Experienced Facilitators:** Skilled trainers can navigate sensitive topics and foster open dialogue.
- **Encourage Honesty and Vulnerability:** Creating a safe space helps participants reflect genuinely on their biases.
- **Integrate Ongoing Learning:** Follow-up sessions and resources support continuous growth.
- **Measure Impact:** Use surveys or behavioral assessments to evaluate changes and refine training.

By adopting these practices, California organizations can maximize the value of implicit bias training and contribute to a more equitable society.

The Future of Implicit Bias Training in California

As California continues to evolve socially and politically, implicit bias training is likely to become even more embedded in institutional policies. Advances in research and technology may lead to more personalized and effective training methods, leveraging data and virtual reality simulations to deepen understanding.

Moreover, implicit bias training will remain part of broader diversity, equity, and inclusion (DEI) initiatives, intersecting with efforts to dismantle systemic barriers and promote social justice.

California's ongoing dedication to implicit bias education sets an example for other states and organizations aiming to create fairer, more respectful environments for all.

Understanding and addressing implicit bias is no small feat, but California's approach to implicit bias training illustrates a meaningful commitment to change. Whether you are a public servant, educator, healthcare provider, or simply a citizen, embracing this training can open doors to personal growth and collective progress in one of America's most diverse states.

California Implicit Bias Training: An In-Depth Review of Its Impact and Implementation

california implicit bias training has emerged as a pivotal element in the state's ongoing efforts to address systemic discrimination and promote equity across public institutions. As awareness of unconscious biases grows, California has positioned itself at the forefront of mandating and encouraging implicit bias education, particularly within law enforcement, education, and healthcare sectors. This professional review aims to dissect the objectives, methodologies, and effects of California's implicit bias training programs, while critically examining their role in fostering meaningful social change.

Understanding California Implicit Bias Training

Implicit bias training in California seeks to illuminate the often-unconscious prejudices that affect decision-making and behavior. Unlike overt discrimination, implicit biases operate

beneath conscious awareness, influencing interactions and judgments in subtle yet impactful ways. The state's legislative efforts have underscored the need for structured training to counteract these biases, especially given California's diverse demographic landscape.

Since the enactment of laws such as Senate Bill 230 and Assembly Bill 241, many public agencies in California have incorporated implicit bias curricula aimed at reducing disparities in policing, education outcomes, and healthcare delivery. These programs typically include modules on recognizing implicit bias, understanding its social and psychological roots, and developing strategies to mitigate its effects.

Key Features of California's Implicit Bias Training Programs

California's implicit bias training varies by institution but generally shares several defining characteristics:

- **Evidence-Based Curriculum:** Programs rely on psychological research and social science to explain how implicit biases form and manifest.
- **Interactive Learning:** Training often includes scenario-based exercises, role-playing, and group discussions to enhance self-awareness and empathy.
- **Continuous Education:** Rather than one-off workshops, some agencies implement ongoing sessions to reinforce concepts and track progress.
- **Customization:** Tailoring content to specific sectors, such as law enforcement or healthcare, to address unique challenges and contexts.

These features reflect a comprehensive approach designed to not only educate but also encourage behavioral change.

The Impact of California Implicit Bias Training on Public Institutions

The implementation of implicit bias training has had a varied but generally positive impact across California's public systems. Law enforcement agencies, for example, have reported increased awareness among officers about racial profiling and disproportionate use of force. According to a 2022 report by the California Department of Justice, approximately 75% of police departments statewide have integrated implicit bias modules into their training regimens, resulting in measurable improvements in community relations and complaint reduction.

In education, implicit bias training aims to bridge the achievement gap by addressing unconscious expectations and disciplinary disparities. Schools that have adopted these programs note a gradual shift in teacher perceptions and student engagement. However, challenges remain, including resistance from some educators and the need for more robust evaluation methods to assess long-term efficacy.

Healthcare providers in California have also embraced implicit bias training as a tool to reduce health disparities, particularly among marginalized populations. Studies indicate that such training can improve provider-patient communication and increase cultural competence, although translating awareness into practice requires sustained institutional commitment.

Pros and Cons of Implicit Bias Training in California

While the benefits of implicit bias training are widely acknowledged, the approach is not without criticism. A balanced review reveals nuanced considerations:

- **Pros:**

- Raises self-awareness and promotes empathy among participants.
- Encourages reflection on systemic inequities and personal responsibility.
- Supports diversity and inclusion initiatives with measurable goals.
- Can improve organizational culture and community trust when properly implemented.

- **Cons:**

- Effectiveness may diminish without ongoing reinforcement and leadership support.
- Some critics argue that training alone cannot dismantle deep-rooted structural biases.
- There is potential for resistance or backlash if perceived as punitive or insincere.
- Lack of standardized metrics complicates evaluation of long-term outcomes.

These points highlight the importance of integrating implicit bias training within broader strategies aimed at systemic reform.

Comparative Perspectives: California Versus Other States

California's approach to implicit bias training is often cited as a model due to its legislative backing and comprehensive implementation. However, it is instructive to compare these efforts with those in other states to contextualize their scope and impact.

States like New York and Oregon have also mandated implicit bias training for public employees, but California distinguishes itself through its early adoption and integration into multiple sectors simultaneously. For instance, while New York mandates training primarily for law enforcement, California extends requirements to educators, healthcare workers, and even state contractors.

Moreover, California's emphasis on continuous training and sector-specific customization contrasts with the more generalized or sporadic approaches seen elsewhere. This reflects a recognition that combating implicit bias requires more than awareness—it demands sustained engagement tailored to the unique dynamics of each field.

Challenges in Implementation and Future Directions

Despite progressive strides, California implicit bias training faces practical challenges that could influence its future trajectory:

1. **Resource Allocation:** Smaller agencies or districts may struggle to fund comprehensive training programs or secure qualified trainers.
2. **Measuring Success:** Developing reliable metrics to gauge changes in attitudes and behaviors remains complex.
3. **Addressing Resistance:** Overcoming skepticism or opposition within institutions requires strategic communication and leadership buy-in.
4. **Integration with Policy Reform:** Training must be part of larger systemic changes, including policy updates and accountability mechanisms.

Looking ahead, initiatives that combine implicit bias training with data-driven policy adjustments and community engagement hold promise for deeper, more sustainable impact.

California's evolving landscape of implicit bias education reflects a broader societal push toward equity and justice. By continuously refining its strategies and fostering open dialogue, the state aims to transform implicit awareness into explicit action, setting a precedent for other regions seeking to confront unconscious prejudice at institutional levels.

california implicit bias training: Comprehensive Healthcare Simulation: Nursing Jared M. Kutzin, KT Waxman, Connie M. Lopez, Debra Kiegaldie, 2024-02-28 Simulation-based education is a rapidly expanding field. The use of simulation was pioneered in anesthesiology and nursing over 50 years ago. However, recent advances have allowed simulation to become commonplace in many different educational environments. These environments include undergraduate nursing education, graduate nursing education, and post-graduate clinical education. This book provides an in-depth review of the common simulation techniques used in each setting and then dives deeper into each of the practice areas that nurses use for simulation. The book offers an overview for novice simulation users as well as a resource for simulation users looking to expand into other uses. Capturing the latest advances, this book brings a comprehensive review of graduate and post-graduate clinical simulation together in a single resource.

california implicit bias training: Black Health Keisha Ray, 2023 Why do American Black people generally have worse health than American White people? To answer this question, *Black Health* dispels any notion that Black people have inferior bodies that are inherently susceptible to disease. This is simply false racial science used to justify White supremacy and Black inferiority. A genuine investigation into the status of Black people's health requires us to acknowledge that race has always been a powerful social category that gives access to the resources we need for health and wellbeing to some people, while withholding them from other people. Systemic racism, oppression, and White supremacy in American institutions have largely been the perpetrators of differing social power and access to resources for Black people. It is these systemic inequities that create the social conditions needed for poor health outcomes for Black people to persist. An examination of social inequities reveals that is no accident that Black people have poorer health than White people. *Black Health* provides a succinct discussion of Black people's health, including the social, political, and at times cultural determinants of their health. Using real stories from Black people, Ray examines the ways in which Black people's multiple identities--social, cultural, and political--intersect with American institutions--such as housing, education, environmentalism, and health care--to facilitate their poor outcomes in pregnancy and birth, pain management, sleep, and cardiovascular disease.

california implicit bias training: Disease and Discrimination Sourav Kumar Nag, 2024-06-25 This book examines disease in the context of gender discrimination. It highlights and explores how socio-economic, political, cultural, and gender dimensions play a crucial role in understanding and defining disease. Through two broad categories – non-literary and literary – the volume discusses concerns such as media representation of gender, racial violence, domestic violence, and healthcare discrimination during Covid-19 pandemic, and focuses on the literary representation of gender discrimination related to diseases within and beyond South Asia. The chapters are based on fieldwork, demographic investigations, and statistics that offer a clear and comprehensive insight into the problems. This book will be beneficial to students and researchers of gender studies, pandemic studies, literature, anthropology, social sciences, and disease humanities.

california implicit bias training: The Poisoning of the American Mind Lawrence M. Eppard, Jacob L. Mackey, Lee Jussim, 2024-09-25 What would you have to believe in order to dress up as a shaman, paint your face, and storm the U.S. Capitol? What could possibly lead somebody to claim that it upholds white supremacy to encourage hard work, self-reliance, rational thinking, punctuality, and politeness? Such behaviors would have been unimaginable only a few years ago. And yet here we are, witnessing millions of people across the political spectrum displaying these clear indications of an epistemically poisoned mind. Both red America and blue America are retreating into their own information bubbles, seceding from a common reality. Both consume far too much misinformation and disinformation, developing worldviews that can sometimes be unintelligible to others. This book explores these disturbing developments and what they mean for our society and implores us all to recover a shared sense of what is true.

california implicit bias training: Racial Microaggressions Daniel G. Solórzano, Lindsay Pérez Huber, 2020 Drawing from over 2 decades of research, this book offers an in-depth analysis of a systemic form of everyday racism commonly experienced by People of Color. Racial microaggressions are layered and cumulative assaults, often carried out in subtle and unconscious ways, which take a psychological and physiological toll on the body, mind, and spirit. The authors make a unique contribution to the study of racial microaggressions by using Critical Race Theory (CRT) to develop the concepts, frameworks, and models provided in this book. Focusing on the lived experiences of People of Color, Racial Microaggressions in Education can be used to disrupt the everyday racism that continues to target so many Communities of Color. “A brilliant and timely contribution to the current discussions and actions related to race and racism.” —Dolores Delgado Bernal, California State University, Los Angeles “An excellent review of critical race theory and methods.” —Margaret Montoya, University of New Mexico “Timely, relevant, evidenced based, and instructive, this book is essential reading for those who want to commit themselves to achieving racial justice in education.” —Tyrone C. Howard, professor, University of California, Los Angeles “Beautifully written with passion, humanity, and academic rigor. An essential examination of racial microaggressions as a key issue facing contemporary educators and society at large.” —David Gillborn, professor of critical race studies, University of Birmingham

california implicit bias training: The Age of Identity Dennis Shirley, Andy Hargreaves, 2023-10-30 There’s more to all of us than what meets the eye A perfect storm is upon us and educators are in the middle of it. Identity issues often incite and divide us, but they are actually our way out of the storm. No one should be oppressed or have to hide who they are, and young people

need to be prepared for a future where they can learn to live together and help others belong. In their beautifully written book, Dennis Shirley and Andy Hargreaves brilliantly show how we can and must engage with young people's identities in their fullness and complexity. Rooted in classical and contemporary theories of identity, extensive research, and in sheer common sense, their book takes us from bitterness to belonging and includes: Examples of how schools seek to address identity and belonging Strategies to deal with the raging identity controversies in our schools and societies Charts and graphics to help build inclusive professional communities Constant invitations to readers to apply ideas to their own work

california implicit bias training: *Under the Skin* Linda Villarosa, 2022-06-14 PULITZER PRIZE FINALIST • A stunning exposé of why Black people in our society 'live sicker and die quicker'—an eye-opening game changer.—Oprah Daily From an award-winning writer at the New York Times Magazine and a contributor to the 1619 Project comes a landmark book that tells the full story of racial health disparities in America, revealing the toll racism takes on individuals and the health of our nation. In 2018, Linda Villarosa's New York Times Magazine article on maternal and infant mortality among black mothers and babies in America caused an awakening. Hundreds of studies had previously established a link between racial discrimination and the health of Black Americans, with little progress toward solutions. But Villarosa's article exposing that a Black woman with a college education is as likely to die or nearly die in childbirth as a white woman with an eighth grade education made racial disparities in health care impossible to ignore. Now, in *Under the Skin*, Linda Villarosa lays bare the forces in the American health-care system and in American society that cause Black people to “live sicker and die quicker” compared to their white counterparts. Today's medical texts and instruments still carry fallacious slavery-era assumptions that Black bodies are fundamentally different from white bodies. Study after study of medical settings show worse treatment and outcomes for Black patients. Black people live in dirtier, more polluted communities due to environmental racism and neglect from all levels of government. And, most powerfully, Villarosa describes the new understanding that coping with the daily scourge of racism ages Black people prematurely. Anchored by unforgettable human stories and offering incontrovertible proof, *Under the Skin* is dramatic, tragic, and necessary reading.

california implicit bias training: *The Routledge International Handbook of Discrimination, Prejudice and Stereotyping* Cristian Tileagă, Martha Augoustinos, Kevin Durrheim, 2021-08-29 This handbook explores prejudice, stereotyping and discrimination primarily as phenomena embedded in the social organization of societies and connected to structural factors and larger societal systems. It offers a unique critical and cross-disciplinary approach to the study of contemporary manifestations of prejudice, stereotyping and discrimination. New socio-psychological analyses of the most pressing social problems of our age bring into view future directions of research on prejudice, stereotyping and discrimination oriented to social change and collective action and that engage with wider systems of norms and discourse. The editors draw on social psychology, sociology, social policy, clinical psychology, cultural studies and feminist, antiracist and decolonizing social science to show how social psychology can successfully rekindle its intellectual dialogue with kindred social science fields to create broader foundations for the exploration of the paradoxes lodged at the heart of the social expression of prejudice in liberal democracies. This is essential reading for anyone interested in prejudice, discrimination and stereotypes. The handbook will be of interest to academics and researchers exploring both the quantitative and qualitative aspects of discrimination, inequality and social exclusion, as well as students undertaking masters or doctoral studies in social psychology, political psychology and political science.

california implicit bias training: *Zaccagnini & White's Core Competencies for Advanced Practice Nursing: A Guide for DNPs* Diane Schadewald, 2024-01-04 Zaccagnini & White's Core Competencies for Advanced Practice Nursing: A Guide for DNPs, Fifth Edition continues to be the only textbook intended as the go to resource to help students understand what it means to be a DNP. Across the nation Doctorate of Nursing Practice (DNP) programs can now be found in every state with program growth continuing. In April 2021, the AACN released the new Essentials: Core

Competencies for Professional Nursing practice. Although this shifts the Essentials from degree-based competencies to practice level-based competencies, there remains a great need for a dedicated resource that serves as the template for new and existing DNP programs to support faculty and students as they collectively participate in DNP programming, teaching, and direct care service in multiple roles--

california implicit bias training: Criminal Juries in the 21st Century Cynthia Najdowski, Margaret Stevenson, 2018-08-20 The jury is often hailed as one of the most important symbols of American democracy. Yet much has changed since the Sixth Amendment in 1791 first guaranteed all citizens the right to a jury trial in criminal prosecutions. Experts now have a much more nuanced understanding of the psychological implications of being a juror, and advances in technology and neuroscience make the work of rendering a decision in a criminal trial more complicated than ever before. *Criminal Juries in the 21st Century* explores the increasingly wide gulf between criminal trial law, procedures, and policy, and what scientific findings have revealed about the human experience of serving as a juror. Readers will contemplate myriad legal issues that arise when jurors decide criminal cases as well as cutting-edge psychological research that can be used to not only understand the performance and experience of the contemporary criminal jury, but also to improve it. Chapter authors grapple with a number of key issues at the intersection of psychology and law, guiding readers to consider everything from the factors that influence the initial selection of the jury to how jurors cope with and reflect on their service after the trial ends. Together the chapters provide a unique view of criminal juries with the goal of increasing awareness of a broad range of current issues in great need of theoretical, empirical, and legal attention. *Criminal Juries in the 21st Century* will identify how social science research can inform law and policy relevant to improving justice within the jury system, and is an essential resource for those who directly study jury decision making as well as social scientists generally, attorneys, judges, students, and even future jurors.

california implicit bias training: Newsom Unleashed Ellie Gardey Holmes, 2024-06-18 Gavin Newsom has been a force in California politics since the 1990s, having acquired power through the machinations of his family and friends. As mayor of San Francisco, his Hollywood mystique and historic progressive policies meant that he could do no wrong—even when he was caught having an affair with his secretary, who also happened to be his friend's wife. Eventually, however, Newsom's brazen pursuit of power caused even the Left to sour on him, forcing him into the purgatory that was the lieutenant governor's office. But suave, cocky, and unrelenting, Newsom soon claimed the governorship, where he was free to insert woke policies into every aspect of Californians' lives. With Jennifer Siebel Newsom, his glamorous but scandal-ridden "first partner," at his side, Newsom has pushed California leftward into a dirtier and more dangerous version of itself—and positioned himself for his ultimate goal: the White House. This account probes Newsom's life and influence, addressing the homelessness crisis, COVID lockdowns, the recall, the education wars, and his combative relationships with Ron DeSantis and Donald Trump, while also shedding new light on issues like his relationship with a teenager as mayor, his New Age wedding, and his financial scandals. As a result, the real Gavin Newsom is uncovered—the one behind the veil of media adoration.

california implicit bias training: Tasman's Psychiatry Allan Tasman, Michelle B. Riba, Renato D. Alarcón, César A. Alfonso, Shigenobu Kanba, Dusica Lecic-Tosevski, David M. Ndeti, Chee H. Ng, Thomas G. Schulze, 2024-09-04 Authored by over 500 internationally acclaimed expert editors and chapter authors from around the world. Completely updated and expanded with almost 40 new chapters. Significantly increased attention to the role of culture in all aspects of evaluation and care. New sections on Digital Mental Health Services and Technologies, Treatment Issues in Specific Populations and Settings, and on Prevention, Systems of Care, and Psychosocial Aspects of Treatment address key advances. This edition is the first comprehensive reference work to cover the entire field of psychiatry in an updateable format, ensuring access to state of the art information. Earlier editions were called "the best current textbook of psychiatry" by the New England Journal of Medicine, and "the gold standard" by the American Journal of Psychiatry. Tasman's Psychiatry, 5th Edition, builds on the initial vision in prior editions of approaching psychiatric evaluation and care from an integrative bio-psycho-social-cultural perspective. It is designed to be an essential and accessible reference for readers at any level of experience. This editorial approach encompasses the importance of the first encounter between patient and clinician, followed by the complex task of beginning to develop a therapeutic relationship and to develop and implement a treatment plan in collaboration with the patient. The importance of increasing attention to the role of culture and social determinants of mental health is reflected both in specific chapters and in components of many chapters throughout the book, especially in those pertaining to clinical evaluation, the therapeutic alliance, and treatment. The global scope of this edition is reflected throughout the book, including the section on psychiatric disorders where evaluation using both ICD 11 and DSM 5-TR is discussed. Most chapters are authored by experts from at least two different countries or continents, adding a critically important dimension which often is missing in major psychiatric textbooks. Tasman's Psychiatry, 5th Edition, is an essential reference for all medical professionals and students who need a trusted reference or learning tool for psychiatry, psychology, clinical research, social work, counseling, therapy, and all others.

california implicit bias training: The Coming of Neo-Feudalism Joel Kotkin, 2023-01-10

Following a remarkable epoch of greater dispersion of wealth and opportunity, we are inexorably returning towards a more feudal era marked by greater concentration of wealth and property, reduced upward mobility, demographic stagnation, and increased dogmatism. If the last seventy years saw a massive expansion of the middle class, not only in America but in much of the developed world, today that class is declining and a new, more hierarchical society is emerging. The new class structure resembles that of Medieval times. At the apex of the new order are two classes—a reborn clerical elite, the clerisy, which dominates the upper part of the professional ranks, universities, media and culture, and a new aristocracy led by tech oligarchs with unprecedented wealth and growing control of information. These two classes correspond to the old French First and Second Estates. Below these two classes lies what was once called the Third Estate. This includes the yeomanry, which is made up largely of small businesspeople, minor property owners, skilled workers and private-sector oriented professionals. Ascendant for much of modern history, this class is in decline while those below them, the new Serfs, grow in numbers—a vast, expanding property-less population. The trends are mounting, but we can still reverse them—if people understand what is actually occurring and have the capability to oppose them.

california implicit bias training: Intentioning Gloria Feldt, 2021-09-28 Intentioning by best-selling author Gloria Feldt will help you envision the life and career you might have thought were impossible dreams, then give you the courage and actionable tools to achieve them. In the wake of the coronavirus pandemic and a pandemic of racial injustice that together shook our world to its core and revealed deep fault lines in our culture, Gloria Feldt, New York Times best-selling author, speaker, commentator, international leadership expert, successful CEO, and feminist icon, shows how we can seize the once-in-a-lifetime opportunity created by massive disruption to build back stronger with diverse women at the center of the recovery. In *Intentioning: Sex, Power, Pandemics, and How Women Will Take The Lead for (Everyone's) Good*, Feldt inspires diverse women to embrace their personal power to lead with intention, confidence, and joy. It comes as no surprise to her that women flexed their formidable muscles when needed most, representing a disproportionate number of essential workers during the darkest days of the coronavirus global outbreak and leading the charge against racism in the United States. But this book is decidedly about the future, taking the leadership lessons learned from this disruption and creating a better world for all. Feldt not only unveils the next step in advancing gender parity in all spheres of business and life, but she also lays out the vital next steps in the overall advancement of our economy and our civilization. The “Lead Like a Woman” framework and the “9 Leadership Intentioning Tools” she presents in this book will prepare, motivate, and propel women of all diversities and intersectionalities now so that by 2025, women will have attained their fair and equal share of leadership positions across all sectors of industry and society. We simply cannot squander women’s talents when so much hangs in the balance. Women must be at the vanguard of reimagining and reconstructing a vibrant and sustainable future for us all.
