Department of Anticolonial History: Exploring the Roots of Resistance and Liberation

department of anticolonial history stands as a vital academic and intellectual space dedicated to studying the struggles against colonial domination and the profound transformations that followed. This specialized department delves into the historical processes through which colonized peoples challenged imperial powers, striving for autonomy, identity, and self-governance. By focusing on the narratives often sidelined in mainstream history, the department of anticolonial history brings to light stories of resistance, resilience, and revolutionary change that shaped the modern world.

The Significance of the Department of Anticolonial History

Understanding the past is crucial to making sense of the present, and nowhere is this clearer than in the study of anticolonial movements. The department of anticolonial history not only traces the political and social upheavals that dismantled empires but also examines the cultural, intellectual, and economic dimensions of decolonization. This field challenges traditional Eurocentric narratives by centering the experiences and voices of colonized peoples.

The significance of this department lies in its commitment to uncovering histories that empower marginalized communities and foster a more inclusive understanding of global history. It provides critical insights into how colonialism shaped contemporary political borders, social hierarchies, and international relations, offering valuable perspectives for scholars, activists, and policymakers alike.

Key Areas of Focus Within the Department

The department of anticolonial history covers a wide array of themes and subjects, including:

- **Colonialism and Imperialism:** Examining the structures and policies that defined colonial rule across continents.
- **Resistance Movements:** Exploring revolts, uprisings, and organized efforts by indigenous populations to reclaim sovereignty.
- **Postcolonial Nation-Building:** Investigating how former colonies navigated the challenges of independence and identity formation.
- **Cultural and Intellectual History:** Analyzing how anticolonial thinkers, writers, and artists contributed to liberation ideologies.
- **Global Connections:** Studying the international networks of solidarity that linked anticolonial struggles worldwide.

Each of these areas offers a rich tapestry of stories and analyses that deepen our understanding of how colonial legacies continue to influence societies today.

Why Study in a Department of Anticolonial History?

Choosing to study within a department of anticolonial history means engaging with a vibrant and dynamic discipline that challenges dominant historical paradigms. Students and researchers are encouraged to critically assess sources, question established narratives, and explore interdisciplinary methods. This department not only nurtures academic rigor but also fosters empathy and global awareness.

Developing Critical Thinking and Analytical Skills

One of the greatest benefits of studying anticolonial history is the cultivation of critical thinking. You learn to analyze complex social and political phenomena, interpret diverse perspectives, and understand the interconnectedness of historical events. This discipline often involves:

- Comparative studies of colonial regimes and their impacts.
- Evaluating primary sources from multiple viewpoints.
- Interrogating the role of race, class, and gender in colonial and anticolonial contexts.

Such skills are invaluable beyond academia, equipping graduates for careers in diplomacy, education, international development, and human rights advocacy.

Connecting Past and Present

The department of anticolonial history also helps bridge historical study with contemporary issues. Many postcolonial challenges—such as economic inequality, cultural identity debates, and geopolitical tensions—are rooted in colonial histories. By understanding these origins, students can contribute to informed discussions and solutions addressing ongoing legacies of colonialism.

Research and Methodologies in Anticolonial History

Research within the department of anticolonial history is notably diverse, inviting scholars to employ various methodologies that best suit their inquiries. Oral histories, archival research, ethnography, and comparative historical analysis are common approaches. This flexibility allows for a nuanced exploration of sources that may be hidden, fragmented, or contested.

Utilizing Oral Histories and Indigenous Perspectives

Many anticolonial histories have been preserved through oral traditions, especially where written records are scarce or biased. The department emphasizes the importance of incorporating indigenous voices and testimonies to reconstruct more accurate and respectful narratives. This approach not only enriches historical knowledge but also respects the sovereignty of the communities studied.

Archival Challenges and Innovations

Colonial archives often reflect the perspectives of colonizers, necessitating critical engagement and innovative interpretation. Scholars in the department of anticolonial history learn to read between the lines, uncover silenced stories, and sometimes digitize or repatriate documents to make them accessible for future generations.

The Impact of Anticolonial History on Contemporary Scholarship and Society

The work produced by the department of anticolonial history reverberates beyond academia, influencing cultural understanding, political activism, and education. By highlighting resistance and liberation, it inspires movements for justice and equality in today's world.

Shaping Curricula and Public Memory

Incorporating anticolonial history into educational curricula challenges students to reconsider national histories and identities. Museums, memorials, and public programs increasingly reflect insights from this field, fostering collective remembrance and dialogue about colonialism's complex legacies.

Informing Policy and International Relations

Understanding anticolonial histories is crucial for policymakers addressing issues like reparations, migration, and development aid. The department's research helps contextualize global inequalities and encourages culturally sensitive approaches to international cooperation.

Exploring Career Paths After Studying Anticolonial History

Graduates from the department of anticolonial history find diverse career opportunities that

leverage their specialized knowledge and analytical skills. Some common paths include:

- **Academia and Research:** Teaching and conducting further research in universities or think tanks.
- **Museum and Heritage Management:** Preserving and presenting histories of colonization and resistance.
- **International Development:** Working with NGOs and agencies on projects that address postcolonial challenges.
- **Journalism and Media:** Reporting on issues related to historical justice and global affairs.
- **Government and Diplomacy:** Advising on policies sensitive to colonial histories and cultural contexts.

The interdisciplinary nature of anticolonial history equips graduates with a broad worldview and critical tools relevant to many fields.

Emerging Trends in the Department of Anticolonial History

As the world evolves, so does the study of anticolonial history. New trends shape both the research agenda and educational priorities within the department.

Digital Humanities and Decolonizing Archives

Technological advancements allow historians to digitize rare documents, create interactive maps, and develop online repositories. These tools democratize access to anticolonial histories and support collaborative global scholarship. Simultaneously, the department emphasizes decolonizing archives by involving descendant communities in preserving and interpreting their histories.

Intersectionality and Global Perspectives

Contemporary research increasingly recognizes the intersections of race, gender, class, and sexuality within anticolonial struggles. Moreover, the department fosters comparative studies that connect anticolonial movements across Africa, Asia, the Caribbean, and the Americas, highlighting shared experiences and unique trajectories.

The department of anticolonial history continues to play a crucial role in reshaping how we

understand the past and engage with the present. By centering stories of resistance and liberation, it opens pathways to a more just and informed global society. Whether you are a student, researcher, or simply a curious learner, exploring this field reveals the rich complexities behind the fight against colonialism and the ongoing quest for freedom.

Department of Anticolonial History: Exploring the Academic Nexus of Resistance and Reclamation

department of anticolonial history represents a specialized academic and research domain dedicated to scrutinizing the multifaceted dimensions of anticolonial movements, ideologies, and the enduring legacies of colonialism worldwide. Embedded within universities, think tanks, and cultural institutions, these departments aim to dissect historical narratives from perspectives often marginalized in mainstream historiography, offering a critical lens on colonial power structures and the various forms of resistance that challenged imperial dominance.

The Emergence and Importance of the Department of Anticolonial History

The establishment of a department of anticolonial history marks a deliberate academic shift towards decolonizing historical scholarship. Traditional colonial histories frequently centered European or imperial viewpoints, often neglecting the voices of colonized peoples or framing their stories through a Eurocentric lens. The department of anticolonial history challenges this bias by foregrounding indigenous, subaltern, and nationalist narratives, thereby contributing to a more balanced and inclusive understanding of global history.

This field gained momentum particularly in the post-World War II era, coinciding with the rapid decolonization of Asia, Africa, and the Caribbean. Universities recognized the need for dedicated frameworks to study the complex socio-political upheavals, liberation struggles, and intellectual currents that defined this transformative period. Today, a department of anticolonial history continues evolving, integrating interdisciplinary methods from sociology, anthropology, political science, and cultural studies to enrich its analysis.

Core Objectives and Academic Scope

A department of anticolonial history typically pursues several interconnected objectives:

- **Critical Re-examination of Colonial Narratives:** Reassessing colonial archives, official documents, and historiographies to uncover suppressed or distorted accounts.
- **Documenting Resistance Movements:** Researching various forms of anticolonial resistance, including armed rebellions, intellectual debates, and cultural assertions.
- **Understanding Postcolonial Legacies:** Analyzing the socio-economic and political consequences of colonial rule on contemporary societies.
- **Promoting Decolonial Methodologies:** Emphasizing indigenous knowledge systems and alternative epistemologies in historical research.

Through these goals, the department strives to foster critical awareness among students and scholars about the ongoing impacts of colonialism and the importance of historical justice.

Methodological Approaches in Anticolonial History

The study within a department of anticolonial history is characterized by diverse methodologies that prioritize both empirical rigor and theoretical innovation. Scholars often employ archival research but contextualize findings with oral histories, literature, and art from colonized communities. This multidisciplinary approach ensures a richer, more nuanced portrayal of anticolonial struggles.

Comparatively, while traditional colonial history might rely heavily on official European records, anticolonial history departments emphasize sources that reveal indigenous perspectives. For example, oral testimonies from freedom fighters or local narratives recorded in native languages provide insights inaccessible through colonial archives alone.

Integration of Comparative and Global Perspectives

A distinct feature of the department of anticolonial history is its commitment to comparative analysis. By examining anticolonial movements across continents—such as the Mau Mau uprising in

Kenya, the Indian independence movement, and the Algerian War of Independence—scholars identify common themes like nationalism, identity formation, and strategies of resistance, alongside unique local specificities.

This global outlook enriches understanding of how colonialism functioned as a systemic phenomenon with varied regional manifestations. Furthermore, it situates local histories within broader geopolitical contexts, highlighting transnational exchanges among anticolonial leaders, ideologies, and support networks.

Curriculum and Research Areas within the Department of Anticolonial History

Academic programs within these departments typically offer a wide array of courses and research opportunities that span different time periods, regions, and thematic concerns.

Key Research Themes

- **Decolonization Processes:** Exploration of political, social, and economic transitions from colonial rule to independence.
- **Nationalism and Identity:** Investigations into how colonial subjects forged new identities in opposition to imperial frameworks.
- **Gender and Colonialism:** Analysis of how colonial rule and anticolonial resistance intersected with gender dynamics and roles.
- **Intellectual Histories:** Study of anticolonial thinkers, writers, and activists who shaped liberation ideologies.
- **Memory and Postcolonial Trauma:** Examining how societies remember colonial violence and navigate its aftermath.

Educational Outcomes and Career Paths

Graduates from a department of anticolonial history often pursue diverse careers, including academia, public history, cultural preservation, journalism, and policy analysis. Their specialized knowledge equips them to contribute to debates on reparations, cultural restitution, and the politics of memory, which remain highly relevant in contemporary discussions on postcolonial justice.

Challenges and Debates within the Department of Anticolonial History

While the department of anticolonial history has made significant strides, it faces ongoing challenges. One major debate revolves around balancing rigorous scholarship with activist commitments. Some critics argue that the field's close ties to political causes risk compromising academic objectivity, while proponents maintain that acknowledging power imbalances is essential for truthful historiography.

Another challenge is access to sources, as many colonial archives remain controlled by former imperial powers, sometimes limiting researchers' ability to uncover the full scope of colonial impact. Additionally, the interdisciplinary nature of anticolonial history requires scholars to navigate complex theoretical terrains, which can complicate consensus on methodologies and interpretations.

Pros and Cons of Institutionalizing Anticolonial History

- **Pros:**

- Encourages the diversification of historical narratives and inclusivity.
- Fosters critical thinking about colonial legacies and contemporary inequalities.
- Supports the empowerment of formerly marginalized communities through research and education.

- **Cons:**

- Potential for politicization and ideological bias within academic settings.
- Risk of marginalization within broader historical disciplines due to perceived specialization.
- Challenges in accessing comprehensive primary sources due to institutional gatekeeping.

Despite these challenges, the department of anticolonial history remains a vital arena for rethinking history and its societal functions.

The Future Trajectory of the Department of Anticolonial History

Looking ahead, departments of anticolonial history are increasingly integrating digital humanities tools, such as data visualization and digital archiving, to broaden access to anticolonial narratives. Collaborations with indigenous communities and international institutions are also expanding, promoting more participatory and ethically conscious research practices.

Moreover, the field is poised to intersect more deeply with global movements addressing racial justice, climate change, and economic inequality, all of which have roots in colonial histories. As such, the department of anticolonial history is not only pivotal for historical scholarship but also for informing policy and activism in the 21st century.

Through its commitment to uncovering suppressed histories and fostering critical dialogue, the department continues to challenge established paradigms and inspire new generations of scholars and citizens alike.

department of anticolonial history: *The Political Economy of Colonialism and Nation-Building in Nigeria* Samuel Ojo Oloruntoba, 2021-09-28 This book examines the ways in which colonialism continues to define the political economy of Nigeria sixty years after gaining political independence from the British. It also establishes a link between colonialism and the continued agitation for restructuring the political arrangement of the country. The contributions offer various perspectives on how the forceful amalgamation of disparate units and diverse nationalities have undermined the realization of the development potential of Nigeria. The book is divided into two parts. The first part interrogates the political economy of colonialism and the implications of this on economic development in contemporary Nigeria. The second part examines nation-building, governance, and development in a postcolonial state. The failure of the postcolonial political elites to ensure inclusive governance has continued to foster centrifugal and centripetal forces that question the legitimacy of the state. The forces have deepened calls for secession, accentuated conflicts and predispose the country to possible disintegration. A new government approach is required that would ensure equal representation, access to power and equitable distribution of resources.

department of anticolonial history: The Anticolonial Front John Munro, 2017-09-21 This is a transnational history of the activist and intellectual network that connected the Black freedom struggle in the United States to liberation movements across the globe in the aftermath of World War II. John Munro charts the emergence of an anticolonial front within the postwar Black liberation movement comprising organisations such as the National Association for the Advancement of Colored People, the Council on African Affairs and the American Society for African Culture and leading figures such as W. E. B. Du Bois, Claudia Jones, Alphaeus Hunton, George Padmore, Richard Wright, Esther Cooper Jackson, Jack O'Dell and C. L. R. James. Drawing on a diverse array of personal papers, organisational records, novels, newspapers and scholarly literatures, the book follows the fortunes of this political formation, recasting the Cold War in light of decolonisation and racial capitalism and the postwar history of the United States in light of global developments.

department of anticolonial history: The History of Africa Molefi Kete Asante, 2014-10-10 There is a paradox about Africa: it remains a subject that attracts considerable attention yet rarely is there a full appreciation of its complexity. African historiography has typically consisted of writing Africa for Europe—instead of writing Africa for itself, as itself, from its own perspectives. The History of Africa redresses this by letting the perspectives of Africans themselves take center stage. Authoritative and comprehensive, this book provides a wide-ranging history of Africa from earliest prehistory to the present day—using the cultural, social, political, and economic lenses of Africa as instruments to illuminate the ordinary lives of Africans. The result is a fresh survey that includes a wealth of indigenous ideas, African concepts, and traditional outlooks that have escaped the writing of African history in the West. The new edition includes information on the Arab Spring, the rise of FrancAfrica, the presence of the Chinese in Africa, and the birth of South Sudan. The chapters go up to the present day, addressing US President Barack Obama's policies toward Africa. A new companion website provides students and scholars of Africa with access to a wealth of supporting resources for each chapter, including images, video and audio clips, and links to sites for further research. This straightforward, illustrated, and factual text allows the reader to access the major developments, personalities, and events on the African continent. This groundbreaking survey is an indispensable guide to African history.

department of anticolonial history: Routledge Handbook of the History of Colonialism in South Asia Harald Fischer-Tiné, Maria Framke, 2021-09-01 The Routledge Handbook of the History of Colonialism in South Asia provides a comprehensive overview of the historiographical specialisation and sophistication of the history of colonialism in South Asia. It explores the classic works of earlier generations of historians and offers an introduction to the rapid and multifaceted development of historical research on colonial South Asia since the 1990s. Covering economic history, political history, and social history and offering insights from other disciplines and 'turns' within the mainstream of history, the handbook is structured in six parts: Overarching Themes and Debates The World of Economy and Labour Creating and Keeping Order: Science, Race, Religion, Law, and Education Environment and Space Culture, Media, and the Everyday Colonial South Asia in the World The editors have assembled a group of leading international scholars of South Asian history and related disciplines to introduce a broad readership into the respective subfields and research topics. Designed to serve as a comprehensive and nuanced yet readable introduction to the vast field of the history of colonialism in the Indian subcontinent, the handbook will be of interest to researchers and students in the fields of South Asian history, imperial and colonial history, and global and world history.

department of anticolonial history: The Routledge Companion to Postcolonial African Historiography Thula Simpson, Immanuel R. Harisch, 2025-05-09 The Routledge Companion to Postcolonial African Historiography explores history's fortunes in Modern Africa south of the Sahara, from the discipline's Golden Age as a handmaiden in struggles against colonialism, to difficult decades when its survival has been threatened by capricious political and economic conditions, and the uncertain present where the continent's historians struggle to justify their value to frequently sceptical publics. In exploring the discipline's practical role in past struggles for African

emancipation the volume speaks directly to these challenging but changing circumstances. The chapters feature contributions from leading experts on historiographical traditions of different regions of the continent. They collectively demonstrate how the process of instrumentalizing the past to advance lay struggles has influenced the choices historians have made regarding sources, methodology, interpretation, audiences, and platforms. This practical application has strongly shaped the diverse forms that African historiography has assumed, as reflected in this book. The themes discussed offer a platform for inserting Africa into comparative studies of global historiographical traditions, whilst also contributing to contemporary debates on decolonization. In offering accessible insights from leading historians, this is an essential handbook for students and scholars of African history and historiography, as well as all those interested in postcolonial studies.

department of anticolonial history: *The Oxford Encyclopedia of African Thought* Abiola Irele, 2010 From St. Augustine and early Ethiopian philosophers to the anti-colonialist movements of Pan-Africanism and Negritude, this encyclopedia offers a comprehensive view of African thought, covering the intellectual tradition both on the continent in its entirety and throughout the African Diaspora in the Americas and in Europe. The term African thought has been interpreted in the broadest sense to embrace all those forms of discourse - philosophy, political thought, religion, literature, important social movements - that contribute to the formulation of a distinctive vision of the world determined by or derived from the African experience. The Encyclopedia is a large-scale work of 350 entries covering major topics involved in the development of African Thought including historical figures and important social movements, producing a collection that is an essential resource for teaching, an invaluable companion to independent research, and a solid guide for further study.

department of anticolonial history: *Anti-Fascism in a Global Perspective* Kasper Braskén, Nigel Copsey, David J Featherstone, 2020-09-20 This book initiates a critical discussion on the varieties of global anti-fascism and explores the cultural, political and practical articulations of anti-fascism around the world. This volume brings together a group of leading scholars on the history of anti-fascism to provide a comprehensive analysis of anti-fascism from a transnational and global perspective and to reveal the abundance and complexity of anti-fascist ideas, movements and practices. Through a number of interlinked case studies, they examine how different forms of global anti-fascisms were embedded in various national and local contexts during the interwar period and investigate the interrelations between local articulations and the global movement. Contributions also explore the actions and impact of African, Asian, Latin American, Caribbean, and Middle Eastern anti-fascist voices that have often been ignored or rendered peripheral in international histories of anti-fascism. Aimed at a postgraduate student audience, this book will be useful for

modules on the extreme right, political history, political thought, political ideologies, political parties, social movements, political regimes, global politics, world history and sociology. Chapters 5 and 10 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

department of anticolonial history: (Re)Constructing Memory: Education, Identity, and Conflict Michelle J. Bellino, James H. Williams, 2017-02-08 How do schools protect young people and call on the youngest citizens to respond to violent conflict and division operating outside, and sometimes within, school walls? What kinds of curricular representations of conflict contribute to the construction of national identity, and what kinds of encounters challenge presumed boundaries between us and them? Through contemporary and historical case studies—drawn from Cambodia, Egypt, Northern Ireland, Peru, and Rwanda, among others—this collection explores how societies experiencing armed conflict and its aftermath imagine education as a space for forging collective identity, peace and stability, and national citizenship. In some contexts, the erasure of conflict and the homogenization of difference are central to shaping national identities and attitudes. In other cases, collective memory of conflict functions as a central organizing frame through which citizenship and national identity are (re)constructed, with embedded messages about who belongs and how social belonging is achieved. The essays in this volume illuminate varied and complex inter-relationships between education, conflict, and national identity, while accounting for ways in which policymakers, teachers, youth, and community members replicate, resist, and transform conflict through everyday interactions in educational spaces.

department of anticolonial history: African Studies Now Eric Essono Tsimi, Andrea Behrends, Sabelo Ndlovu-Gatsheni, 2025-09-18 This edited volume provides a comprehensive analysis of the evolving landscape of African studies in the new millennium. It details new trends, approaches, and theoretical frameworks that have the potential to shape the future of the discipline. Curated by the up-and-coming scholar Eric Tsimi in collaboration with the distinguished anthropologist Andrea Behrends and field-leading decolonial theorist Sabelo Ndlovu-Gatsheni, this collection explores methods and approaches being developed across the humanities and social sciences for decolonizing knowledge, facilitating knowledge transfer, and addressing perceived gaps between theory and practical emergencies. For its broad coverage of a broad interdisciplinary field, as well as for its in-depth insights into the latest developments within the field as a whole, *African Studies Now* is a must-have for researchers and students of African studies, global development, indigenous studies, and related fields and disciplines.

department of anticolonial history: Cultural Competence and Healing Culturally Based Trauma with EMDR Therapy Mark Nickerson, 2022-09-17 Praise for the first edition: This book is on the cutting edge—it shows us the vast potential of EMDR in healing culturally based traumas that persist today and the traumas that are endemic to our cultural histories. The topics targeted could not be timelier . . . Now in its second edition, this groundbreaking text continues to offer guiding direction on the frontiers of culturally informed EMDR therapy and the treatment of culturally based trauma and adversity Over twenty-five authors combine to address a diverse range of current and emerging topics. Ten new second edition chapters include a call for broader recognition of culturally based trauma and adversity within the trauma field, the core human need for connection and belonging, and strategies for clinician self-reflection in developing a culturally competent clinical practice that is multicultural inclusive, actively anti-oppressive, and grounded in cultural humility. Other new chapters offer considerations in working with Black, American Indian, Asian-American, and Latinx clients; immigration challenges; and social class identity. Overall, this book provides graspable conceptual frameworks, useful language and

terminology, in-depth knowledge about specific cultural populations, clinical examples, practical intervention protocols and strategies, research citations, and additional references. This text speaks not only to EMDR practitioners but has been recognized as a groundbreaking work for therapists in clinical practice. New to the Second Edition: Ten new chapters addressing timely topics A framework for defining and depicting different themes of Culturally Based Trauma and Adversity (CBTA) Specific considerations for working with Black, American Indian, Asian-American, Latinx clients, and other racial/ethnic populations Exploration of social class related experiences and identities as well as additional coverage of challenges related to immigration and acculturation Key Features: Twenty-eight contributing authors with diverse professional and lived experiences Best-practice methods for cultural competence integrated into EMDR therapy Culturally attuned clinical assessment and case formulation Innovative protocols and strategies for treating socially based trauma and adversity Enriches the adaptive information processing model with research-based knowledge of social information processing Specific chapters devoted to LGBTQIA+ issues and transgenerational cultural trauma including antisemitism Strategies and a protocol for dismantling social prejudice and discrimination Combines conceptual theory with practical application examples and methods

department of anticolonial history: Designing History in East Asian Textbooks Gotelind Mueller, 2011-02-01 This book analyses the efforts throughout East Asia to deploy education for purposes of political socialization, and in particular in order to shape notions of identity. The chapters also examine the trend of 'common textbook initiatives', which have recently emerged in East Asia with the aim of helping to defuse tensions arguably fuelled by existing practices of mutual (mis)representation. These are analysed in relation to the East Asian political context, and compared with previous and ongoing endeavours in other parts of the world, particularly Europe, which have been keenly observed by East Asian practitioners. Written by a group of international education experts, chapters discuss the enduring focus on the role of curricula in inculcating homogenous visions of the national self, and indeed homogenized visions of significant 'others'. Including contributions from scholars and curriculum developers involved personally in the writing of national and multi-national history textbooks this book will be of interest to students and scholars of Asian education, Asian history and comparative education studies. Gotelind Müller is Professor of Chinese Studies, University of Heidelberg, Germany

department of anticolonial history: The Politics of Historical Production in Late Qing and Republican China Tze-ki Hon, Robert Culp, 2007-09-30 This book examines forms of Chinese historical production happening outside the mainstream of academic history, through such new measures as the publication of textbooks, the writing of local history, the preservation of archival materials, and government attempts to establish orthodox historical accounts. The book does so in order to broaden the scope of modern Chinese historiography, when it focuses primarily on a small group of writers such as Liang Qichao, Gu Jiegang, and Fu Sinian. Directly linking historical writings to the formation of the nation, the justification of elite authority, and the cultivation of active citizenry, this book shows that historiography is essential to understanding the uniqueness of Chinese modernity. Also available in paperback.
