scarborough me: Current Strategies to Improve the Nutritional and Physical Quality of Baked Goods Mario Martinez Martinez, Manuel Gómez Pallarés, 2020-03-18 The lifestyle of humans is rapidly changing, and, correspondingly, their needs and the current and future megatrends of the food market. It is worth mentioning (1) the preference for natural, simple, and flexible diets that drive the further expansion of plant-focused formulations, (2) the focus on food sustainability (food waste reduction), and (3) the interest in healthy eating as the basis for good health. The hectic routine and rapid urbanization in developed and developing regions, respectively, have shifted consumer preferences toward bread and baked foods, which, interestingly, are often high in sugars and are categorized as having a high glycemic index. Therefore, it is of major importance to address the technological challenges of manufacturing baked goods with high physical and sensory quality

that result in positive metabolic responses. This Special Issue seeks to provide fundamental understanding in this area and novel strategies to improve the nutritional properties of baked goods, including a decrease in starch bioaccessibility, sugar reduction, increase in fiber and/or protein content, and the improvement of phytochemical bioactivity. This Special Issue will also cover studies on the physical and sensory improvements of baked goods that may provide a mechanistic understanding to minimize the loss of quality after the incorporation of nutritional-improving ingredients, such as edible byproducts, proteins, or fibers. Last but not least, studies focused on the reduction of additives (clean label) or fat and on the use of sourdough to improve the sensory properties of baked goods will also be included.

scarborough me: *A Forgotten Landscape: How A Place Called Crockett's Corner Became The Maine Mall* M.M. Drymon PhD, 2015-10-25 A place called Crockett's Corner began as a seventeenth century colonial settlement that grew into a stable and sustainable nineteenth century American agrarian landscape. During thetwentieth century, in a rapid but staged process, the landscape was changed into an edge city. These changes were the direct result, especially after 1938, of prevailing public policies which acted to constrain some land uses while supporting others.Landscape change has had unintended consequences, including local social network destruction,historic building demolition, and unmitigated air and non-point source water pollution. Raising awareness of the deep history of this place may help empower advocates for historic preservation, open space, environmental protection and more sustainable land use practices in the future.

scarborough me: Down East Lincoln Paine, 2018-06-19 This engaging overview of Maine's maritime history ranges from early Native American travel and fishing to pre-Plymouth European settlements, wars, international trade, shipbuilding, boom-and-bust fisheries, immigrant quarrymen, quick-lime production, yachting, and modern port facilities, all unfolding against one of the most dramatic seascapes on the planet. Down East can be read in an evening but will be referred to again and again. When the first edition was published in 2000, Walter Cronkite—a veteran Maine coastal sailor as well as The Most Trusted Man in America—wrote that “Paine's economy of phrase and clarity of purpose make this book a delight.” Paine went on to write his monumental opus The Sea and Civilization: A Maritime History of the World (PW starred review), but now returns to his first and most abiding love, the coast of Maine, to revise and update this gem of a book. The new edition is printed in a large, full-color format with a stunning complement of historical photos, paintings, charts, and illustrations, making this a truly visual journey along a storied coast.
