watch the fault in our stars on youtube: Transmedia Storytelling Jennifer Camden, Kate Faber Oestreich, 2018-12-14 This volume charts the evolution of Pemberley Digital's transmedia adaptations of nineteenth-century novels in order to interrogate the uneasy relationship between transmedia storytelling and consumer culture. It first examines two Austen-centered films, *Lost in Austen* and *Austenland*, that present "immersive" Austen experiences that anticipate Pemberley Digital's transmedia adaptations, bridging traditional film adaptations and transmedia's participatory culture. Subsequent chapters turn to Pemberley Digital's transmedia adaptations of Austen's and Shelley's novels to argue that, although such adaptations may appear feminist in their emphasis on female protagonists, their larger narratives expose a subtext of anxiety about unstable gender roles, financial vulnerability, and the undervaluation of career-specific skill sets, both for the

characters and the production company itself. The study provides a robust theoretical framework within which to read transmedia adaptations of "classic literature," illuminating both the potential of, and the challenges facing, digital and transmedia storytellers and participants.

watch the fault in our stars on youtube: *A Theory of Everyone* Michael Muthukrishna, 2025-02-04 A blueprint for a better future that offers a unified theory of human behavior, culture, and society. Playing on the phrase 'a theory of everything' from physics, Michael Muthukrishna's ambitious, original, and deeply hopeful book *A Theory of Everyone* draws on the most recent research from across the sciences, humanities, and the emerging field of cultural evolution to paint a panoramic picture of who we are and what exactly makes human beings different from all other forms of life on the planet. Muthukrishna argues that it is our unique ability to create culture, a shared body of knowledge, skills, and experience passed on from generation to generation, that has enabled our current dominance. But it is only by understanding and applying the laws of life—the need for energy, innovation, cooperation, and evolution—that we can solve the practical and existential challenges we face as a species. *A Theory of Everyone* attempts to provide solutions for the most pressing problems of our collective future, such as polarization, inequality, the 'great stagnation' in productivity, and the energy crisis. Casting a bold and wide net, Muthukrishna's book is a must-read for anyone interested in a better future for ourselves and for generations to come.

watch the fault in our stars on youtube: *Cancer and Young Adult Literature* Stephen M. Zimmerly, 2024-12-20 This collection specifically and solely focuses on Young Adult literature texts where cancer plays a prominent role, including widely-read texts like John Green's *The Fault in Our Stars*, Nicholas Sparks' *A Walk to Remember*, and Jesse Andrews' *Me and Earl and the Dying Girl*. The chapters present a variety of arguments, each developing a novel investigation into how these stories explore the effects cancer has on a person, a family, or on a relationship. As scientific studies continue to develop new understandings of the biology behind cancer, and new sociological studies continue to uncover how a cancer diagnosis impacts the fabric of our culture(s), these collected essays continue to investigate how authors have woven cancer into the stories we write for young people. A number of distinct avenues are taken here, arguing for new approaches in crafting narrative, deeper appreciation for family support networks (or their absence), and what literary criticism can uncover when applied to cancer narratives.

watch the fault in our stars on youtube: *Pocket Protector* Tim Glaser, Rolf F. Nohr, 2023 Nerds werden belächelt als sozial unbeholfene weiße Männer mit schlechtem Geschmack und einer Vorliebe für Technologie. Doch Nerd-Themen wie digitale Selbstverteidigung, Spezialinteressen oder Silicon-Valley-Technikoptimismus sind mittlerweile im Mainstream angekommen. Das zeigt sich auch in der Popkultur am Erfolg von Serien wie *The Big Bang Theory* oder in der medialen Darstellung prominenter Nerds wie Bill Gates oder Elon Musk. Solche bekannten Nerd-Phänomene sind Teil vielfältiger, teilweise widersprüchlicher und weniger offensichtlicher Diskurse. Zu ihnen gehören Nerd-Symbole wie das Stifte-Etui – der titelgebende Pocket Protector – ebenso wie konzertierte Aktionen am Aktienmarkt oder die absichtliche und selbstbewusste Übernahme von Nerd-Klischees. Der Band versucht anhand von Einzelanalysen das Geflecht zwischen Medien, Kultur und Technologien auszuloten, das die Figur des Nerds hervorbringt. Dabei werden etwa Artikulationsformen, Aneignung, Körperpolitiken, Repräsentation, Technologie(kultur) und die Stabilisierung von sozialen Distinktionen untersucht. Themen dieser Beiträge sind Gamer Girls, Unterschiede zwischen Otaku, Nerds und Geeks, der Gamestop-Hype, Online-Communitys sowie Nerds in Musik, Religion, TikTok und Reality-TV.
