internet marketing with wordpress mercer david: *Power, Inc.* David Rothkopf, 2012-02-28 The world's largest company, Wal-Mart Stores, has revenues higher than the GDP of all but twenty-five of the world's countries. Its employees outnumber the populations of almost a hundred nations. The world's largest asset manager, a secretive New York company called Black Rock, controls assets greater than the national reserves of any country on the planet. A private philanthropy, the Bill and Melinda Gates Foundation, spends as much worldwide on health care as the World Health Organization. The rise of private power may be the most important and least understood trend of our time. David Rothkopf provides a fresh, timely look at how we have reached a point where thousands of companies have greater power than all but a handful of states. Beginning with the story of an inquisitive Swedish goat wandering off from his master and inadvertently triggering the birth of the oldest company still in existence, *Power, Inc.* follows the rise and fall of kings and empires, the making of great fortunes, and the chaos of bloody revolutions. A fast-paced tale in which champions of liberty are revealed to be paid pamphleteers of moneyed interests and greedy scoundrels trigger changes that lift billions from deprivation, *Power, Inc.* traces the bruising jockeying for influence right up to today's financial crises, growing inequality, broken international system, and battles over the proper role of government and markets. Rothkopf argues that these recent developments, coupled with the rise of powers like China and India, may not lead to the triumph of American capitalism that was celebrated just a few years ago. Instead, he considers an unexpected scenario, a contest among competing capitalisms offering different visions for how the

world should work, a global ideological struggle in which European and Asian models may have advantages. An important look at the power struggle that is defining our times, *Power, Inc.* also offers critical insights into how to navigate the tumultuous years ahead.

internet marketing with wordpress mercer david: Resistance and Empowerment in Black Women's Hair Styling Elizabeth Johnson, 2016-04-08 Elizabeth Johnson's *Resistance and Empowerment in Black Women's Hair Styling* develops the argument that one way Black women define themselves and each other, is by the way they style/groom their hair via endorsement by the media through advertisement, idealized identification of Black female celebrities, and encouragement by professional celebrity hair stylists who serve as change agents. As a result, hair becomes a physical manifestation of their self-identity, revealing a private and personal mindset. Her research answers the following questions: What is the relationship between Black females' choice of hairstyles/grooming and transmitted messages of aesthetics by the dominant culture through culturally specific magazines?; What role do the natural hair blogs/vlogs play as a change agent in encouraging or discouraging consumers grooming their hair in its natural state?; What impact does a globalized consumer market of Black hair care products have on Hispanic/Latinas and Bi-Racial women?; Are Black female Generation Y members more likely to receive backlash for failure to conform their hair to dominant standards in their hair adornment in the workplace? Johnson thus demonstrates that the major concern from messages sent to Black women about their hair is its impact on Black identity. Thus, the goal of Black women should be to break with hegemonic modes of seeing, thinking, and being for full liberation. This critical and deep consciousness will debunk the messages told to Black women that their kinky, frizzy, thick hair is undesirable, bad, unmanageable, and shackling.
