It's not solely about technical skills; Walmart also looks for candidates who demonstrate problem-solving abilities, adaptability, and strong communication skills.

What Is the Purpose of the Assessment?

The assessment is meant to screen candidates efficiently and fairly. Types of Questions on the Walmart Hourly Retail Associate Assessment

If you're wondering about the specific types of questions you'll face, here's a breakdown:

1. Situational Judgment Questions

These questions place you in hypothetical workplace scenarios and ask how you would respond. For example, you might be asked how to handle a difficult customer or how to prioritize tasks when the

store is busy. Walmart uses these to assess your decision-making, customer service skills, and ability to stay calm under pressure.

2. Behavioral Questions

Behavioral questions focus on past experiences and how you've handled certain situations in previous jobs or life experiences. They often start with prompts like "Tell us about a time when..." or "How do you usually approach...". These help Walmart understand your personality and work ethic.

Basic math skills are essential for retail associates, especially when handling transactions or stocking. Expect questions that involve simple arithmetic, percentages, and logical reasoning. These test your numerical fluency and problem-solving skills.
