The Lost Civilization of Lemuria: Frank Joseph's Fascinating Exploration

the lost civilization of lemuria frank joseph is a captivating topic that intertwines mystery, ancient history, and speculative archaeology. Frank Joseph, a prolific writer and researcher known for his work on lost civilizations and esoteric history, has brought renewed attention to Lemuria, a hypothetical ancient continent said to have vanished beneath the ocean. But what exactly is Lemuria, and how does Frank Joseph's interpretation differ from traditional accounts? Let's dive deep into this intriguing subject and explore the layers of myth, science, and speculation surrounding the lost civilization of Lemuria according to Frank Joseph.

The Origins of Lemuria: A Mysterious Continent

The story of Lemuria begins not as a myth, but as a scientific hypothesis. In the 19th century, zoologists and geologists noticed puzzling similarities among species found in India, Madagascar, and other parts of the Indian Ocean. To explain these biogeographical oddities, scientist Philip Sclater proposed a lost landmass named "Lemuria" that once connected these regions. Though later geological discoveries, especially plate tectonics, disproved the need for such a continent, the idea of Lemuria captured the imagination of occultists, mystics, and writers alike.

Frank Joseph's Take on Lemuria

Frank Joseph's perspective on Lemuria is not limited to the scientific origins of the theory. Instead, he delves into the notion that Lemuria was home to an advanced civilization possessing knowledge and technologies lost to time. Unlike the conventional view of Lemuria as a purely speculative land, Joseph treats it as a real historical entity with profound cultural and spiritual significance.

In his research, Joseph often ties Lemuria to ancient myths from various cultures, suggesting that this civilization might have influenced early human development and spiritual traditions. His writings encourage readers to rethink the boundaries between archaeology, mythology, and ancient wisdom.

Ancient Texts and Myths Supporting Lemuria's

Existence

One of the reasons Frank Joseph's exploration of Lemuria resonates is his use of ancient texts and folklore. He points to legends from the Pacific Islands, India, and even parts of Africa that describe a lost land or civilization swallowed by the sea. These stories often include elements of advanced knowledge, spiritual enlightenment, and catastrophic destruction—hallmarks of what Joseph interprets as the fate of Lemuria.

Mythological Connections

- **Hindu Scriptures:** Ancient Indian texts like the Puranas describe a continent called "Kumari Kandam," which some scholars and enthusiasts equate with Lemuria. According to these texts, Kumari Kandam was a flourishing land where early Tamil civilization thrived before being submerged.
- **Pacific Island Legends:** Many island cultures speak of a "lost island" or continent from which their ancestors originated, hinting at a shared memory of Lemuria.
- **Theosophical Influence:** The 19th-century Theosophical Society, particularly Helena Blavatsky, popularized Lemuria as the home of a spiritually advanced "root race," a concept that Frank Joseph references and expands upon in his work.

Archaeological and Geological Perspectives

While mainstream archaeology and geology remain skeptical of Lemuria as a sunken continent, Frank Joseph's approach encourages a more open-minded investigation. He emphasizes that many ancient ruins, submerged structures, and unexplained artifacts might be remnants of Lemurian civilization. Joseph urges readers to consider alternative explanations for such findings rather than dismissing them outright.

Submerged Ruins and Geological Evidence

Some underwater archaeological sites, such as those off the coasts of India and Japan, have sparked debate about whether they could be remnants of Lemuria or similar lost lands. Frank Joseph discusses these findings with a focus on:

- **Unexplained Megalithic Structures:** Massive stone constructions that challenge current understanding of ancient engineering.
- **Sudden Geological Changes:** Evidence of rapid sea level rise and tectonic shifts that could have submerged large landmasses.
- **Ancient Maps:** Some old maps depict landmasses that no longer exist,

potentially hinting at Lemuria's former presence.

Frank Joseph's Contribution to the Study of Lost Civilizations

Frank Joseph has carved a unique niche in the field of alternative history. His detailed research, blending archaeology, mythology, and esotericism, offers a fresh perspective on lost civilizations like Lemuria. By challenging mainstream narratives, Joseph invites readers to explore the possibility that humanity's origins and ancient history may be far more complex than traditionally believed.

Why His Work Matters

- **Bridging Myth and Science:** Joseph's writings help bridge the gap between mythological accounts and scientific inquiry, offering a holistic view of ancient history.
- **Inspiring Curiosity:** His engaging storytelling encourages readers to question accepted histories and explore the mysteries of the past.
- **Preserving Cultural Memory:** By highlighting myths from diverse cultures, Joseph underscores the importance of ancient narratives in understanding human heritage.

The Lost Civilization of Lemuria: Frank Joseph's Exploration into an Ancient Enigma

the lost civilization of lemuria frank joseph has remained a subject of intrigue and speculation among historians, archaeologists, and enthusiasts of ancient mysteries. Frank Joseph, a prolific author and researcher, has contributed significantly to the discourse surrounding Lemuria, presenting theories that challenge conventional archaeological narratives. His work delves into the possibility of a sophisticated, prehistoric civilization that once thrived in a region long submerged beneath the oceans—a hypothesis that continues to provoke debate and curiosity.

Unveiling Lemuria: The Context and Origins of the Theory

The concept of Lemuria originated in the 19th century as a hypothetical landmass proposed to explain the distribution of certain species across continents separated by oceans. Initially coined by zoologist Philip Sclater to account for lemur fossils found in Madagascar and India but absent in Africa and the Middle East, Lemuria soon transcended scientific circles into the realm of esoteric and mystical thought.

Frank Joseph's investigations situate Lemuria not merely as a geological or biological explanation but as a lost civilization endowed with advanced knowledge and cultural sophistication. His research draws from a range of

sources, including ancient texts, mythologies, and alleged archaeological findings, to reconstruct the narrative of a society that predates known ancient civilizations.

Frank Joseph's Methodology and Sources

Unlike mainstream archaeologists who rely heavily on empirical evidence and peer-reviewed findings, Frank Joseph adopts an interdisciplinary approach. He examines mythological accounts from diverse cultures, such as the Pacific Islanders, Hindus, and Native American tribes, searching for common threads that might hint at a shared memory of Lemurian society. Additionally, Joseph incorporates alternative archaeology, which often involves controversial interpretations of artifacts and sites.

This approach has sparked criticism from the academic community, which questions the validity and scientific rigor of blending mythology with archaeology. Nevertheless, Joseph's work remains influential within certain circles interested in alternative history and ancient mysteries.

The Characteristics of Lemurian Civilization According to Frank Joseph

Frank Joseph portrays Lemuria as a civilization marked by remarkable technological and spiritual achievements. According to his narrative, Lemurians possessed advanced knowledge of astronomy, architecture, and metaphysics, possibly surpassing that of later ancient cultures such as the Egyptians and Sumerians.

Technological and Cultural Features

Joseph speculates that Lemuria was home to monumental structures aligned with celestial bodies, indicating a sophisticated understanding of astronomy. Furthermore, he suggests that Lemurians had developed early forms of energy manipulation and healing practices, as inferred from various cultural traditions and esoteric texts.

The spiritual dimension of Lemurian society is also emphasized, with Joseph highlighting the purported existence of a harmonious relationship between humans and nature. This theme resonates with descriptions of Lemuria found in Theosophical literature, which often depict the lost continent as a utopian society with advanced psychic abilities.

Geographical and Historical Claims

One of the more contentious aspects of Frank Joseph's work involves the proposed geographic location and timeline of Lemuria. He posits that Lemuria existed in the Indian and Pacific Oceans and was destroyed by cataclysmic events such as massive earthquakes or volcanic eruptions, which led to its submersion.

Joseph's timeline places Lemuria tens of thousands of years ago, far preceding established ancient civilizations. This assertion raises challenges, as there is limited geological and archaeological evidence supporting the existence of a large, sunken landmass in these regions within the proposed timeframe.

Critical Reception and Scholarly Perspectives

Frank Joseph's claims about the lost civilization of Lemuria have elicited mixed reactions. Among alternative historians and enthusiasts of ancient mysteries, his work is often praised for its imaginative scope and willingness to challenge orthodox narratives. Conversely, mainstream scholars generally regard his theories as speculative, lacking the empirical support necessary for academic acceptance.

Pros of Frank Joseph's Lemuria Hypothesis

- **Interdisciplinary Approach:** By integrating mythology, archaeology, and esoteric knowledge, Joseph encourages a broader exploration of human history.
- **Stimulates Interest:** His work has popularized the notion of lost civilizations, inspiring further research and debate.
- **Cultural Connections:** Identifying parallels across various mythologies fosters a deeper appreciation for shared human heritage.

Cons and Criticisms

- **Lack of Empirical Evidence:** Critics argue that Joseph's claims are not substantiated by credible archaeological or geological data.
- **Overreliance on Mythology:** The blending of myth with history may obscure

objective analysis.

- **Scientific Inconsistencies:** Geological studies do not support the existence of a large sunken continent in the Indian or Pacific Oceans within the proposed era.

Comparing Lemuria with Other Lost Civilizations

Frank Joseph's exploration of Lemuria naturally invites comparisons with other legendary lost civilizations like Atlantis and Mu. While Atlantis is often associated with Western classical traditions and Plato's dialogues, Lemuria's origins are rooted in 19th-century scientific hypotheses and Eastern esoteric teachings.

Joseph's depiction of Lemuria aligns more closely with the spiritual and metaphysical attributes found in Theosophical accounts, whereas Atlantis is commonly portrayed as a technologically advanced but morally decadent society. Mu, another proposed sunken continent in the Pacific, shares similarities with Lemuria in terms of geographic speculation but is less prominently featured in Joseph's body of work.

The Role of Myth and Legend

The interweaving of myth, legend, and archaeology in the study of lost civilizations reflects humanity's enduring fascination with origins and the unknown. Frank Joseph's work exemplifies this blend by attempting to reconstruct a plausible history from fragmented stories and unexplained archaeological artifacts.

This approach highlights the importance of critical thinking when dealing with such topics. While myths can preserve kernels of historical truth, they often undergo transformation over time, making it challenging to distinguish fact from fiction.

The Lost Civilization of Lemuria in Contemporary Culture

In recent decades, the lost civilization of Lemuria, as interpreted by Frank Joseph and others, has permeated popular culture, influencing literature, film, and new age spirituality. The narrative of an ancient, enlightened civilization destroyed by natural cataclysms resonates with themes of environmental caution and rediscovery of lost wisdom.

Joseph's contributions have also impacted alternative archaeology and pseudo-historical communities, where Lemuria is frequently cited as evidence of forgotten epochs and suppressed knowledge. This cultural presence sustains ongoing interest and debate, ensuring that the mysteries surrounding Lemuria endure.

The discourse surrounding the lost civilization of Lemuria, particularly through the lens of Frank Joseph's research, underscores the complexities inherent in reconstructing ancient histories that lie beyond the reach of conventional evidence. While skepticism remains warranted, the allure of such enigmatic civilizations continues to captivate the imagination and invites deeper inquiry into the origins of human culture and civilization.

the lost civilization of lemuria frank joseph: Survivors of Atlantis Frank Joseph, 2004-08-10 Explores scientific evidence from four cataclysmic events that led to the development of civilization and the downfall of Atlantis • The sequel and companion volume to The Destruction of Atlantis • Studies the connections between the world-conquering war the Atlanteans launched and the quartet of natural catastrophes that ravaged the earth more than 5,000 years ago •

Demonstrates that the Atlanteans ran an imperial copper trade empire that stretched from North America to Asia Minor Archaeologists have long puzzled over the evidence suggesting highly sophisticated copper mining activities in the area of the Great Lakes some 5,000 years ago. Menomonee Indian tradition speaks of fair skinned mariners who had come in the past to “dig out the shiny bones” of the Earth Mother. Plato, meanwhile, recorded that Atlanteans provided an exceptionally high grade of copper that was no longer available in his time. In this sequel to The Destruction of Atlantis, Frank Joseph argues that the Menomonee Indians’ mariners were Atlanteans and that the destruction of Atlantis by war and natural catastrophe brought about the end of Bronze Age civilization. Furthermore, Atlantis’s survivors dispersed to all sides of their former island empire into Western Europe, the Near East, and North and South America. In Survivors of Atlantis Frank Joseph provides an in-depth study of the Atlantean war and the intimate connections it had with the last of four great cosmic catastrophes generated by the cyclical return of a comet and its debris. This quartet of natural disasters was followed by mass migrations recorded in the histories of such diverse peoples as the Incas of Peru, the Celtic Irish, the Classical Greeks, and the Aztecs of Mexico. Where the archaeology, mythology, astronomy, and geology of these cultures coincide, a common thread is exposed: Atlantis. Joseph shows that the fate of the Atlantean empire is the story of early civilization and reveals Atlantis to be a credible part of the world’s history.

the lost civilization of lemuria frank joseph: Advanced Civilizations of Prehistoric America Frank Joseph, 2009-12-21 Frank Joseph reveals that modern civilization in North America was preceded by four advanced cultures that rose and fell over the past three thousand years. the lost civilization of lemuria frank joseph: Military Encounters with Extraterrestrials Frank Joseph, 2018-09-11 The first, comprehensive military history of armed confrontations between humans and extraterrestrials • Includes documentation of incidents from World War I, World War II, the Korean War, the Vietnam War, the Gulf War, and the ongoing hostilities in the Middle East • Reveals the U.S. Navy’s defeat in Antarctica by ETs, the shoot-down of “flying saucers” at Roswell, alien sabotage of nuclear weapons, in-flight abductions of USAF and Soviet officers, and photographic evidence of the Battle of Los Angeles • Explains the link between the development of atomic bombs and ballistic missiles and the increase in extraterrestrial intervention in the 20th century Although close encounters with alien space craft are reported as far back as the reign of Pharaoh Thutmosis III in Egypt, it wasn’t until the 20th century that UFO sightings and

extraterrestrial encounters were truly documented, due to advances in technology and record-keeping as well as the vast increase in incidents, particularly with military forces. Revealing his extensive research and the verifiable evidence he's discovered, Frank Joseph presents a comprehensive military history of armed confrontations between humans and extraterrestrials in the 20th and 21st centuries. He explains how, with the development of atomic bombs and ballistic missiles, the frequency of extraterrestrial intervention in human affairs increased dramatically. He documents incidents both famous and little known, including the explosive demolition of U.S. munitions factories in 1916 by unearthly aerial vehicles, the Red Baron's dogfight with a UFO during World War I, "foo fighter" sightings and battles with Allied and Axis combatants during World War II, and eye-witness reports from encounters during the Korean War, the Vietnam War, the Gulf War in Iraq, and the ongoing hostilities in the Middle East. He examines the evidence for the shoot-down of "flying saucers" at Roswell and Aztec, New Mexico, alien sabotage of nuclear weapons systems, and in-flight abductions of USAF and Soviet officers and airplanes. He explores the photo evidence for the Battle of Los Angeles, which occurred three months after Pearl Harbor, and the details of Operation Highjump, the U.S. Navy's defeat in Antarctica by ET forces 17 months after the atomic bomb was dropped on Nagasaki, while also uncovering evidence of secret Antarctic German bases. The author also examines recent, 21st-century examples of alien interdiction in Earthly affairs, such as the meltdown of the Fukushima Daiichi nuclear plant in Japan and the fiery abort of Elon Musk's Falcon 9 missile launch, both events accompanied by UFOs. Offering complete disclosure of the multitude of ET events over the past century, Frank Joseph gives us the first true reference book in the field of alien military encounters.

the lost civilization of lemuria frank joseph: The Human Odyssey: A Hidden History Krsanna Duran, 2012 Departure from the Garden represents the maiden flight of humanity from its earliest beginning with ancestors from the stars. The ancestor races evolved from the same universal code from which the oldest human species grew, many of whom have now left human evolution behind them to climb to even greater states within the universal code. The most ancient emblem on Earth observed in modern UFO contact guides the search for Native America's ancestors, those who returned to Mexico in 1991 in the most extensive UFO activity in modern history. Traces of Native America's ancestors, the ancient astronauts, have often been dismissed as too impossibly ancient to believe. And it is the factor of what can be perceived as reality or truth that is followed in this search for humanity through the manifestation of mind and the shamanic perspective in North America's oldest pyramids. Recent scientific discovery of super continents and new excavations at Gobekli Tepe in Turkey are examined in light of traditional lore from the remote corners of the Earth. The search for The People Of Life, those who opened the tree of life to repopulate Native America, leads through Earth's oldest cultures -- Egypt, Greece, India, Tibet and Mu, the motherland.

the lost civilization of lemuria frank joseph: Jaredites: the Missing Civilization X Jim Hendleman, 2013-05-20 This book covers the origin and archaeological development of selected categories of civilized elements identified as being Jaredite in origin. It is an attempt to elevate the Jaredite civilization into the light of day from the heretofore dark mists of history where science has forced it for the last 2,500 years. The Jaredite civilization spanned a possible 2,530 years, and its known achievements have far exceeded those of modern mans in many regards. In c. 2800 BC, the Jaredites built a pair of concrete superhighways over 2,700 miles, complete with paved exits and a secondary road network, nearly the entire length of the South American continent. Their civilization could answer the riddles of the Sphinx, the questions of who built the pyramids and why, the mystery and likely origin of UFOs, prove whether or not George Lucas had the only ET, detail what Noah brought aboard the ark besides three sons and their families, and provide an answer to the question posed to Dr. J. Robert Oppenheimer by a student as to whether Alamogordos nuclear bomb in July 1945 was the first ever atomic bomb explosion in history. Many other possible but likely Jaredite achievements are incredibly fascinating and await only an honest archaeological effort to prove them. The historical facts exist; they are real and three-dimensional, but to date, standard classical science has relegated them to the dustbin of history's forgotten basement closet. Satan has

made a tremendous effort since mankind's beginning to keep man blinded to the historical facts of our heritage, causing the deliberate destruction of millions of artifacts, scrolls, books, and whole libraries throughout the world to do so. This book is but a small effort to expose and make known a portion of mankind's previously hidden but rightful heritage.

the lost civilization of lemuria frank joseph: The Petroglyphs of Mu Carole Nervig, 2022-08-09 • Shows how the archetypal symbols of the Pohnpaid petroglyphs have exact counterparts in other ancient cultures throughout the world • Provides evidence that Pohnpaid is closely related to--yet predates--neighboring Nan Madol • Includes hundreds of Pohnpaid petroglyphs and stone circle photos, many never before seen While residing on the small Pacific island of Pohnpei in the 1990s, Carole Nervig discovered that a recent brush fire had exposed hundreds of previously unknown petroglyphs carved on gigantic boulders. This portion of the megalithic site called Pohnpaid was unknown even to Pohnpei's state historic preservation officer. The petroglyphs were unlike others from Oceania, so Nervig began investigating and comparing them with petroglyphs and symbols from around the world. In this fully illustrated exploration, Nervig documents her discoveries on Pohnpei, revealing how the archetypal symbols of the Pohnpaid petroglyphs have exact counterparts in other ancient cultures and universal motifs throughout the world, including the Australian Aborigines, the Inca in Peru, the Vedic civilization of India, early Norse runes, and Japanese symbols. She provides evidence that Pohnpaid is closely related to--yet predates--neighboring Nan Madol and shows how Pohnpaid was an outpost of the sunken Kahnihmueiso, a city of the now-vanished civilization of Mu, or Lemuria. Discussing the archaeoastronomical function of the Pohnpaid stones, the author examines how many of the glyphs symbolize celestial phenomena and clearly reveal how their creators were sky watchers with a sophisticated understanding of astronomy, geophysics, geomancy, and engineering. She shows how the scientific concepts depicted in the petroglyphs reveal how the citizens of Mu had a much deeper understanding of the living Earth than we do, which gave them the ability to manipulate natural forces both physically and energetically. Combining archaeological evidence with traditional oral accounts, Nervig reveals Pohnpaid not only as a part of a geodetic network of ancient sacred sites and portals but also as a remnant of the now submerged but once enlightened Motherland of Mu.

the lost civilization of lemuria frank joseph: Lost Race of the Giants Patrick Chouinard, 2013-09-28 An exploration of mythological and archaeological evidence for prehistoric giants • Examines the many corresponding giant mythologies throughout the world, such as the Greek and Roman titans, Norse frost giants, and the biblical Nephilim • Reveals recent finds of giant skeletons in the deserts of Saudi Arabia and India • Explains how giants passed on their sophisticated culture and civilization to humanity before being wiped out in the great age of cataclysms and floods Giants are a cornerstone of the myths, legends, and traditions of almost every culture on Earth. Stories of giants are often considered fantasies of the ancients or primitive attempts to explain natural phenomena, but archaeological discoveries of 10- and 12-foot skeletons--many of which have been suppressed--confirm the existence of a forgotten golden age of giants before recorded history. Patrick Chouinard examines the staggering number of corresponding giant mythologies throughout the world, such as the Greek and Roman titans, Norse frost giants, the Hindu Daityas, the biblical Nephilim, the Celtic Formorach, the Sumerian Anunnaki, and the multitude of myths in which the sky or world is held aloft on the shoulders of a giant. He links these stories to Atlantis as well as other legends of prehistoric civilizations lost to cataclysm and great floods whose survivors spawned the rise of ancient civilizations. The author reveals how physical remains of giant-size peoples have been found on almost every continent, including recent finds in the deserts of Saudi Arabia, Afghanistan, and northern India as well as hundreds of excavations of giant mummies and skeletons across the United States, corresponding directly with Native American accounts of red-haired giants. He also examines reports from famous explorers such as Magellan, Sir Francis Drake, and Desoto of their encounters with giants on the North American continent. Revealing how giants represent the true earthborn race, Chouinard explains how they engaged in open conflict with the extraterrestrial gods who created humanity for forced labor and how they passed their sophisticated

culture and civilization on to humanity before being nearly wiped out in the great age of cataclysms.

the lost civilization of lemuria frank joseph: Jaredites Jim Hendleman, 2013-05 *Jaredites: The Missing Civilization X* Jim Hendleman This book covers the origin and archaeological development of selected categories of civilized elements identified as being Jaredite in origin. It is an attempt to elevate the Jaredite civilization into the light of day from the heretofore dark mists of history where science has forced it for the last 2,500-years. The Jaredite Civilization spanned a possible 2,530-years in length and their known achievements alone have far exceeded those of modern man's successes in many regards. In c.2500 BC, the Jaredites built a pair of concrete super highways over 2,700-miles, complete with paved exits and a secondary road network, nearly the entire length of the South American continent. Their civilization could answer the riddles of the Sphinx; the questions of who built the pyramids, and why; the mystery and likely origin of UFO's; prove whether or not George Lucas had the only ET; detail what Noah brought aboard the Ark besides three of his sons and their families and provide an answer to the question posed to Dr J. Robert Oppenheimer by a student as to whether Alamogordo's nuclear bomb in July 1945 was the first ever atomic bomb explosion in history. Many other possible but likely Jaredite achievements are incredibly fascinating and await only an honest archaeological effort to prove them. The historical facts exist; they are real and three-dimensional but to date, standard classical science has relegated

them to the dustbin of history's forgotten basement closet. Satan has made a tremendous effort since mankind's beginning to keep man blinded to the true historical facts of our heritage, causing the deliberate destruction of millions of artifacts, scrolls, books and their libraries throughout the world to do so. This book is but a small effort to expose and make known a portion of mankind's previously hidden, but rightful heritage.

If, in so doing, a few sacred paradigms are busted, we say, let the chips fall where they may!" - J. Douglas Kenyon, Editor & Publisher, Atlantis Rising

the lost civilization of lemuria frank joseph: Before Atlantis Frank Joseph, 2013-03-24 A comprehensive exploration of Earth's ancient past, the evolution of humanity, the rise of civilization, and the effects of global catastrophes • Explores biological evidence for the aquatic ape theory and 20-million-year-old evidence of pre-human cultures from which we are not descended • Traces the genesis of modern human civilization to Indonesia and the Central Pacific 75,000 years ago after a near-extinction-level volcanic eruption • Examines the profound similarities of megaliths around the world, including Nabta Playa and Gobekli Tepe, to reveal the transoceanic civilization that built them all Exploring emerging and suppressed evidence from archaeology, anthropology, and biology, Frank Joseph challenges conventional theories of evolution, the age of humanity, the origins of civilization, and the purpose of megaliths around the world. He reveals 20-million-year-old quartzite tools discovered in the remains of extinct fauna in Argentina and other evidence of ancient pre-human cultures from which we are not descended. He traces the genesis of modern human civilization to Indonesia and the Central Pacific 75,000 years ago, launched by a catastrophic volcanic eruption that abruptly reduced humanity from two million to a few thousand individuals worldwide. Further investigating the evolutionary branches of humanity, he explores the mounting

biological evidence supporting the aquatic ape theory--that our ancestors spent one or more evolutionary phases in water--and shows how these aquatic phases of humanity fall neatly into place within his revised timeline of ancient history. Examining the profound similarities of megaliths around the world, including Nabta Playa, Gobekli Tepe, Stonehenge, New Hampshire's Mystery Hill, and the Japanese Oyu circles, the author explains how these precisely placed monuments of quartz were built specifically to produce altered states of consciousness, revealing the spiritual and technological sophistication of their Neolithic builders--a transoceanic civilization fractured by the cataclysmic effects of comets. Tying in his extensive research into Atlantis and Lemuria, Joseph provides a 20-million-year timeline of the rise and fall of ancient civilizations, both human and pre-human, the evolutionary stages of humanity, and the catastrophes and resulting climate changes that triggered them all--events that our relatively young civilization may soon experience.

the lost civilization of lemuria frank joseph: Waipi'O Valley Jeffrey L. Gross, 2017-02-15
Waipio Valley: A Polynesian Journey from Eden to Eden recounts the remarkable migrations of the Polynesians across a third of the circumference of the earth. Their amazing journey began from Kalana i Hauola, the biblical Garden of Eden located along the shore of the Persian Gulf, extended to the Indus River Valley of ancient Vedic India, to Egypt where some ancestors of the Polynesians were on the Israelite Exodus, through Island Southeast Asia and across the Pacific Ocean. They voyaged thousands of miles in double-hull canoes constructed from hollowed-out logs, built with Stone Age tools and navigated by the stars of the night sky. The Polynesians resided on numerous tropical islands before reaching Waipio Valley, the last Polynesian Garden of Eden. Due to their isolation on the islands of the Pacific Ocean, Polynesian religious and cultural beliefs have preserved elements from mankind's past nearer the beginning of human history. Polynesian mythology includes genealogical records of their divine ancestors that extends back to Kahiki, their mystical land of creation and ancient divine homeland created by the gods, epic tales of gods and heroes that preserved records of their ancient voyages, oral chants such as the Hawaiian Kumulipo contain evolutionary creation theories that reflect modern scientific thought, and the belief in a Supreme Creator God.

the lost civilization of lemuria frank joseph: Nothingness, Metanarrative, and Possibility William E. Marsh, 2009-08-14 What is the solution to human angst and nothingness, the gnawing emptiness and frustration with the limits and fragility of this present existence? After reviewing the work of Søren Kierkegaard, Friedrich Nietzsche, Martin Heidegger, and Jean Paul Sartre on this question, this work argues that the proper response must be metaphysical metanarrative, a transcendent metaphysical metanarrative that is the ground of all that is, yet a metaphysical metanarrative that makes the fullness of meaning available and apprehensible in physical experience. This metanarrative, this work asserts, is the logos, the ultimate referent principle of the ancient Greeks and, according to Christianity, the God-man Jesus Christ, the eternal become present in present experience. Because the logos constitutes transcendence in human form, it recognizes the beauty of existential experience even as it underscores the necessity of transcendence for temporal meaning. The logos as metaphysical metanarrative brings the worlds of time and eternity together, linking earth and the beyond in a seamless whole. It is the ultimate existential experience.
