educational psychology active learning edition 14th edition: The Fable of the Mirrors

Xie Weihe, 2024-07-24 This book examines the impact of network society on self-identity and education and proposes key tasks for transforming education in network society. Using the metaphor of the mirror, the book describes the environment and changes in network society based on the internet and information technology. As the diversity and complexity of network society increases, people see more and more self-images in the large mirrors, leading to a variety of developmental orientations and self-identities, as well as more opportunities for objectification. However, this often leads to confusion as to which image in the mirror really represents oneself. This social framework, which forms the backdrop of modern education, poses new challenges for self-identity formation and educational development. The author emphasizes the role of education in constructing a new mirror that can lead children and young people to a better perception of

themselves, and thus to self-identification and self-realization. The title will be of interest to scholars and students in the fields of educational theory and sociology of education, as well as general readers interested in topics related to network society, identity, and education.

educational psychology active learning edition 14th edition: Teaching to Prepare Advocates Mike Yough, Lynley Anderman, 2022-10-01 This book is the fourth volume in the six-part series Theory to Practice: Educational Psychology for Teachers and Teaching. The objective of most other volumes in this series is to help instructors apply and model fundamental principles of learning, assessment, motivation, and development in preparing their students for the diverse, multidimensional, uncertain, and socially-embedded classrooms in which these future educators will

teach. This volume is a strong compliment to others in the series as it prepares readers to be better positioned to advocate for principles of psychology in their programs and departments, and to prepare preservice teachers to do likewise in the K-12 classrooms they will soon guide. Even more, this volume will help instructors in shaping pre-service teachers to be stronger advocates for their own students. This volume is organized around two themes: (1) Advocating for principles and practices of educational psychology, and (2) advocating for students. These themes go hand-in-hand. While advocating for educational psychology principles and evidence-based practices in their schools, teachers also are called upon to advocate for and empower historically marginalized groups of students. Topics in Part I include development of intercultural competency, implementation of professional learning communities, culturalizing the curriculum, journalistic learning, incorporation of inquiry learning, and universal design. Topics in Part II include supporting student self-advocacy, creating an allyship with LGBTQ+ students, advocating for victims of bullying, and supporting students with mental health needs.
