downtown Savannah evolved into the sprawling educational complexes of today, they maintained an impressive record of service to the community's most important citizens: its young people.

Savannah's commitment to public education is as old as the city itself; from the beginning, efforts were made to ensure that education was available to all. The opening of the Massie Common School in 1856 marked the start of the modern era of public education in Savannah. For the first time, a building was designed, built, staffed, and maintained for the express purpose of providing education to all of the city's children, regardless of their families' ability to pay. Massie Common School's first principal eventually left Savannah to become superintendent of Atlanta's public school system, paving the way for local politicians who took their school board experiences with them when they were elected to state office. These pioneers of public education in Savannah spread methods and practices established in local schools throughout the state.

savannah chatham board of education: Forced Justice David J. Armor, 1995-06-30 School desegregation and forced busing first brought people to the barricades during the 1960s and 1970s,

and the idea continues to spark controversy today whenever it is proposed. A quiet rage smolders in hundreds of public school systems, where court-ordered busing plans have been in place for over twenty years. Intended to remedy the social and educational disadvantages of minorities, desegregation policy has not produced any appreciable educational gains, while its political and social costs have been considerable. Now, on the fortieth anniversary of the Supreme Court's epic decision, *Brown v. Board of Education*, the legal and social justifications for school desegregation are ripe for reexamination. In *Forced Justice*, David J. Armor explores the benefits and drawbacks of voluntary and involuntary desegregation plans, especially those in communities with magnet schools. He finds that voluntary plans, which let parents decide which school program is best for their children, are just as effective in attaining long-term desegregation as mandatory busing, and that these plans generate far greater community support. Armor concludes by proposing a new policy of equity choice, which draws upon the best features of both the desegregation and choice movements. This policy promises both improved desegregation and greater educational choices for all, especially for the disadvantaged minority children in urban systems who now have the fewest educational choices. The debate over desegregation policy and its many consequences needs to move beyond academic journals and courtrooms to a larger audience. In addition to educators and policymakers, *Forced Justice* will be an important book for social scientists, attorneys and specialists in civil rights issues, and all persons concerned about the state of public education.

savannah chatham board of education: *The Mismeasure of Minds* Michael E. Staub, 2018-09-25 The 1954 *Brown v. Board of Education* decision required desegregation of America's schools, but it also set in motion an agonizing multidecade debate over race, class, and IQ. In this innovative book, Michael E. Staub investigates neuropsychological studies published between *Brown* and the controversial 1994 book *The Bell Curve*. In doing so, he illuminates how we came to view race and intelligence today. In tracing how research and experiments around such concepts as learned helplessness, deferred gratification, hyperactivity, and emotional intelligence migrated into popular culture and government policy, Staub reveals long-standing and widespread dissatisfaction—not least among middle-class whites—with the metric of IQ. He also documents the devastating consequences—above all for disadvantaged children of color—as efforts to undo discrimination and create enriched learning environments were recurrently repudiated and defunded. By connecting psychology, race, and public policy in a single narrative, Staub charts the paradoxes that have emerged and that continue to structure investigations of racism even into the era of contemporary neuroscientific research.
